SHARE CLASSES A (ISIN FI4000206982), B (ISIN FI4000496617)

KEY INVESTOR INFORMATION DOCUMENT This document includes the key investor information on the fund. This document is not marketing material. The information is required by law to help the investor understand the nature and the risks of investing in this fund. The investor is advised to read it in order to make an informed decision about whether to invest.

OBJECTIVES AND INVESTMENT POLICY

This Fund is a mutual fund, the long-term investment objective of which is to achieve a value increase with active portfolio management by diversifying the assets in compliance with the Act on Mutual Funds and the Fund's rules.

The Fund's investment strategy is to invest in companies that operate in local or global markets and meet the criteria of a quality company in accordance with the Fund Management Company's evaluation. The criteria of a quality company include strong and stable indicators, a strong balance sheet, and strong market position in the particular line of business.

The Fund's investments are globally diversified, and investment allocation does not follow any geographical or sectoral distribution, but instead, the Fund aims to focus on global long-term growth themes in its investment activities.

The Fund invests mainly in equities and equity securities. The Fund's equity investments are relatively centralised, as the Fund invests its assets in the shares or equity securities of ca. 30-50 companies.

- The investor may subscribe and redeem fund units on each banking day.
- The quotation currency of the fund is euro.
- Any income received from the investments of the fund, such as dividends and capital gain, is reinvested.

RISK AND REWARD PROFILE

Typically, lower rewards

Typically, higher rewards

Note that the fund unit's performance involves a low, average, or high risk in accordance with the risk category above: $1-2 = low \mid 3-5 = average \mid 6-7 = high$.

The Fund's risk meter describes the fluctuation in the fund unit's performance during the latest 5-year period. If the Fund has been operating for under 5 years, the risk category is calculated utilizing the Fund's benchmark index, or, if this does not exist, other objective basis for evaluation. The Fund's current risk category is 6. Even the lowest risk category (1) does not mean a risk-free investment. The Fund's risk and reward profile and risk category are subject to change. Historical data on the Fund's risk category cannot be used to predict the future development

of the Fund's risk and reward profile and risk category's future development.

The following risk factors are not necessarily included in the risk meter in full but have an impact on the fund unit's value:

EQUITY MARKET RISK. A fund investing in equities always involves a risk of fluctuation in the investment's market value as a consequence of general market development.

ACTIVE RISK. In its portfolio management, the Fund follows an active investment policy, and thus the Fund's active risk could be described as rather high.

EMERGING MARKET RISK. International investments may involve risks typical for the markets of certain countries.

COUNTERPARTY RISK. A risk that the counterparty in security trade or a derivative contract or the issuer of the instrument is not operating in accordance with the agreed-upon terms and conditions.
