## AXA Lifetime Distribution Fund

A Sub-Fund of AXA Distribution Investment ICVC

Share class : AXA Lifetime Distribution Fund A Accumulation GBP (ISIN : GB00BVJ3C52)

This Sub-Fund is managed by AXA Investment Managers UK Limited, part of the AXA IM Group

### Objective and Investment Policy

#### Investment Objective

The aim of this Fund is to achieve income and capital growth over a period of 5 years or more.

#### Investment Policy

The Fund invests in a mix of shares in UK listed companies and UK Government bonds (the majority of which are linked to the rate of inflation). The Fund's typical asset mix would range between 50-60% investment in shares and 40-50% in UK Government bonds. The fund manager selects shares in companies based upon their prospects for future growth in dividend payments following an in depth analysis of their financial status, quality of business model and corporate governance arrangements. Investments in UK Government bonds are diversified across a range of maturities (i.e., the length of time for full repayment of the bond by the Government), with a bias towards bonds with longer maturities.

The fund manager has full discretion to select investments for the Fund in line with the above investment policy and in doing so may take into consideration a composite benchmark made up of the following indices in the stated proportions: 55% FTSE All-Share Index; 45% FTSE Index Linked Govt All Stocks (the "Benchmark"). This Benchmark best represents the types of bonds and companies in which the Fund predominantly invests.

This Fund is actively managed in reference to the Benchmark, which may be used by investors to compare the Fund's performance.

#### Income

Income from investments in the Fund will be rolled up into the value of your shares if you hold accumulation shares.

#### Fund Currency

The reference currency of the Fund is Sterling.

#### Investment Horizon

This Fund may not be suitable for investors who plan to withdraw their contribution within five years.

#### Processing of subscription and redemption orders

Your orders to buy, sell or transfer shares in the Fund, must be received by the Administrator by 12 noon on any working day to receive that day's Fund price. Please note that if your order is placed by an intermediary or Financial Adviser, they may require extra processing time.

The Net Asset Value of this Fund is calculated on a daily basis.

Minimum initial investment: £100,000

Minimum subsequent investment: £5,000

### Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time.

The lowest category does not mean risk free.

#### Why is this Fund in this category?

The capital of the Sub-Fund is not guaranteed. The Sub-Fund is invested in financial markets and uses techniques and instruments which are subject to some levels of variation, which may result in gains or losses.

#### Additional Risks (risks materially relevant to the fund which are not adequately captured by the indicator)

Counterparty Risk: failure by any counterparty to a transaction (e.g. derivatives and securities lending) with the Fund to meet its obligations may adversely affect the value of the Fund. The Fund may receive assets from the counterparty to protect against any such adverse effect but there is a risk that the value of such assets at the time of the failure would be insufficient to cover the loss to the Fund.

Inflation Linked Bond Risk: unlike other bonds, an inflation protected security (such as index linked gilts) reduces the negative effect of inflation on its real value. The market value of such securities will be affected both by the market's perception of future movements in interest rates and the future rate of inflation. Therefore the market value of such securities (and the value of the Fund) may not move in line with inflation rates in the short to medium term.

Interest Rate Risk: fluctuations in interest rates will change the value of bonds, impacting the value of the Fund. Generally, when interest rates rise, the value of the bonds fall and vice versa. The valuation of bonds will also change according to market perceptions of future movements in interest rates.

Further explanation of the risks associated with an investment in this Fund can be found in the prospectus.

## AXA Lifetime Distribution Fund

### Charges

The charges you pay are used to pay the cost of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

#### One-off charges taken before or after you invest

Entry charge	none
Exit charge	none
This is the maximum that might be taken out of your money before it is invested.	

#### Charges taken from the fund over a year

Ongoing Charges	0.31%
-----------------	-------

#### Charges taken from the fund under certain specific conditions

Performance fee	none
-----------------	------

The entry and exit charges shown are maximum figures. In some cases, you might pay less - you can find this out from your Financial Adviser.

The ongoing charges figure is based on expenses for the previous twelve month period. This figure may vary from year to year. It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please refer to AXA IM website: <https://www.axa-im.co.uk/important-information/fund-charges-and-costs> as well as the Fees and Expenses section of the prospectus which is available at <https://funds.axa-im.com>.

### Past Performance

Past performance is not a reliable indicator of future results.

Past performance is shown after the deduction of ongoing charges. Any entry/exit fees are excluded from the calculation.

The Sub-Fund was launched on 02/03/2015 and the share class in 2015. Past performance has been calculated in Sterling and is expressed as a percentage change of the Fund's Net Asset Value at each year end. Prior to 07.08.2019 the Fund had no benchmark. Since 07.08.2019 the comparator benchmark for the Fund is a composite benchmark made up of the following indices in the stated proportions: 55% FTSE All-Share Index; 45% FTSE Index Linked Govt All Stocks.
