Introduction

The harmonised European Union ("EU") wide regulatory regime for insurance companies, known as Solvency II, came into force with effect from 1st January 2016. The regime requires reporting and public disclosure arrangements to be put in place by insurers. The objective of the Solvency and Financial Condition Report ("SFCR") is to increase transparency in the insurance market by requiring insurance and reinsurance undertakings to disclose publicly, on at least an annual basis, a report on their solvency and financial condition.

In accordance with the European Union (Insurance and Reinsurance) Regulations S.I. No. 485 of 2015, where a participating insurance or reinsurance undertaking or an insurance holding company so decides, and subject to the agreement of the group supervisor, it may provide a single solvency and financial condition report which shall comprise the following:

(a) the information at the level of the group which must be disclosed in accordance with paragraph 1;(b) the information for any of the subsidiaries within the group which must be individually identifiable and disclosed in accordance with Articles 51 and 53 to 55.

Utmost Holdings Ireland Limited ("UHIL") has interpreted \$.258(3)(b) and 258 (5) of \$I 485 2015 European Union (Insurance and Reinsurance) Regulations together to mean that UHIL has an obligation to disclose financial information on all authorised subsidiaries within the overall UHIL group structure. Disclosures with specific financial and non-financial information has been included for all authorised subsidiaries i.e. Utmost PanEurope dac ("UPE"). See Exhibit 1 for a list of all company subsidiaries.

This report has been drafted with consideration given to the UHIL financial position, and the governance structures in place within UPE.

UHIL's financial year runs to 31 December each year and the results are reported in Euro (\in).

See glossary at Appendix G.

Summary

BUSINESS AND PERFORMANCE

UHIL is a wholly owned subsidiary of UIG Holdings (No 1) Limited (''UIG''), a UK incorporated company specialising in the acquisition and consolidation of life assurance businesses. Its principal business is that of a holding company.

As at 31 December 2020, UHIL wholly owned the following subsidiaries:

Exhibit 1 UHIL Subsidiaries

Subsidiary Name	Nature of Business
Utmost PanEurope dac	Life Insurance
Utmost Services Ireland Limited	Management and Administration Services
Utmost Bermuda Limited	Life Insurance
Harcourt Life Corporation dac	Management Activities

UHIL generated a loss after tax for the 2020 financial year of €21,061k. The key drivers of the result are the reduced amortisation write-off of the UPE acquired value of in-force business ("AVIF") with the performance of the underlying subsidiaries being similar year on year.

Utmost PanEurope dac

UPE accounts for the vast majority of income for UHIL in 2020. UPE accounts for nearly 100% of both UHIL's earned premium and fee and commission income combined, with the contribution from UBL being insignificant.

The most significant countries for UPE (by 2020 gross written premium) are Italy, the United Kingdom ("UK"), Finland, Spain and Portugal.

Premiums received during the year relate to Wealth Solutions single and regular premiums, and Corporate Solutions premiums. Total 2020 gross written premiums were €1,237,133k.

The main driver for UPE's premium income and investment contract sales over the last three financial years has been in the Wealth Protection market. While the majority of the premium from this business line relates to Italian business, it also includes business from UK, Spain, Portugal and other EU countries.

UPE generated a loss after tax for the 2020 financial year of €5,321k resulting from significant capital investment, Foreign Exchange ("FX") movements and an increase in provisions.

Utmost Services Ireland Limited

All UHIL staff, with the exception of certain Pre-Approved Control Functions ("PCF") role holders who are employees of UPE, are employees of USIL. USIL provides UPE with management and administrative services with USIL employees deployed to UPE as required. USIL also provides similar management and administrative services to Utmost Bermuda Limited ("UBL") and Utmost Worldwide Limited ("UW").

Utmost Bermuda Limited

UBL's principal activity is that of a run off book. UBL specialises in bespoke investment solutions for wealthy individuals in the form of unit linked life assurance policies and a small number of conventional life assurance policies. UBL has been closed to new business since 2004 and dedicated policies account for the majority of the funds under management.

While UBL is included in the overall UHIL figures and assessments, it is not considered a material entity in the context of the wider UHIL Group.

Harcourt Life Corporation dac

Harcout Life Corporation dac ("HLC") was deauthorised in August 2018 and has no residual life assurance business. While HLC is included in the overall UHIL figures and assessments, it is not considered a material entity in the context of the wider UHIL Group.

SYSTEM OF GOVERNANCE

The UHIL Board of Directors in seeking to apply best practice in corporate governance periodically establishes Committees to help it discharge its responsibilities in respect of the regulated entities. The Directors are satisfied that there is sufficient oversight of the Group's activities through the establishment of Audit Committees and other board sub-committees by its principal subsidiary undertakings, such that committees are not also required at the UHIL level.

It is noted that there is common Board of Director membership between UHIL and UPE.

The information provided on the System of Governance is primarily based on the governance structures in place within the authorised subsidiary, UPE.

In accordance with local laws and Solvency II requirements, UPE has established a Risk Management System, which is defined as a set of strategies, standards, processes and procedures aimed at identifying, measuring, monitoring and reporting on a continuous basis the risks to which UPE is exposed.

As part of its governance structure UPE has established a series of Board Committees with specific delegated authorities. For further information, please refer to Section B.1.1 of this report.

The Internal Control and Risk Management System is put in place within UPE through a specific on-going process which involves, with different roles and responsibilities, the Board, the Executive Committee ("ExCo") and the organisational structures. The functions involved in the risk management process operate according to the Three Lines of Defence approach:

- First Line of Defence: The operational structures (Risk Owners) are the First Line of Defence.
- Second Line of Defence: The Risk Management, Legal and Compliance and Actuarial Functions represent the second line of defence.

Utmost Holdings Ireland Limited Solvency Financial Condition Report Year-End 2020 5/100

• Third Line of Defence: Internal Audit is the Third Line of Defence.

Further information on the System of Governance is outlined in Section B.

RISK PROFILE

UHIL had a solvency coverage ratio of 148.42% at year-end 2020.

It is noted that solvency is assessed on a Solvency II Standard Formula at group level for UHIL and at UPE level.

UPE is well capitalised relative to the risks that it faces. At year-end 2020 UPE had a solvency coverage ratio of 189.28%.

UBL solvency methodology is not based on Solvency II and it is noted that the Bermuda Monetary Authority requires UBL to maintain a minimum solvency margin of USD500k as the book is in run-off.

Further details on UHIL and UPE's key risks are outlined in Section C.

VALUATION FOR SOLVENCY PURPOSES

UHIL's Solvency II assets and liabilities and technical provisions at 31 December 2020 are outlined below.

Exhibit 2a UHIL Solvency II Assets, Liabilities and Technical Provisions

	31 December 2019 €'000	31 December 2020 €'000
Total Assets	18,592,497	18,872,384
Total Liabilities	18,300,569	18,582,092
Net Technical Provisions	17,432,583	17,690,617

UHIL assets, liabilities and technical provisions increased in line with projected growth during 2020.

UPE's Solvency II assets and liabilities and technical provisions at 31 December 2020 are outlined below.

Exhibit 2b UPE Solvency II Assets, Liabilities and Technical Provisions

	31 December 2019 €'000	31 December 2020 €'000
Total Assets	18,299,563	18,451,584
Total Liabilities	17,893,981	18,048,921
Net Technical Provisions	17,167,714	17,287,907

UPE's assets, liabilities and technical provisions increased in line with projected growth over 2020.

Further information on UHIL and UPE's assets and liabilities, including the differences between the Solvency II value and the Statutory Accounts value, is provided in Sections D1 and D3.

CAPITAL MANAGEMENT

Both UHIL and UPE calculate their solvency capital requirement ("SCR") according to the Standard Formula methodology. At 31 December 2020 UHIL had a solvency coverage ratio, calculated using the Standard Formula methodology, of 148.42%. At 31 December 2020 UPE had a solvency coverage ratio, calculated using Utmost Holdings Ireland Limited Solvency Financial Condition Report Year-End 2020 6/100

the Standard Formula methodology, of 189.28%.

UHIL's Own Funds are all classified as Tier 1, with the exception of a GBP 20,000k Loan Note.

UPE's Own Funds are classified as Tier 1, with the exception of a GBP 20,000k Loan Note UPE issued to Utmost Limited ("UL"), located in the Isle of Man, which was established as a Tier 2 capital instrument. The table below outlines the Own Funds that are eligible to meet the SCR and minimum capital requirement ("MCR").

There were no instances of non-compliance with the SCR or MCR for UHIL or UPE during the reporting period.

	31 December 2019	31 December 2020
	€'000	€'000
Solvency Capital Requirement	203,189	210,641
Minimum Capital Requirement	91,435	101,447
Own Funds to Cover SCR	315,551	312,624
Solvency Coverage Ratio	155.30%	148.42%
Own Funds to Cover MCR	310,216	310,581
Minimum Capital Ratio	339.27%	306.15%

Exhibit 3b UPE Solvency Capital Requirement and Minimum Capital Requirement

	31 December 2019	31 December 2020
	€'000	€'000
Solvency Capital Requirement	217,733	224,530
Minimum Capital Requirement	97,980	101,038
Own Funds to Cover SCR	414,204	424,995
Solvency Coverage Ratio	190.23%	189.28%
Own Funds to Cover MCR	409,930	422,870
Minimum Capital Ratio	418.38%	418.52%

Further details on UHIL and UPE's capital position are outlined in Section E.

A. Business and Performance

A.1. BUSINESS

Legal Entity Name:

Utmost Holdings Ireland Limited

Registered Office:

Ashford House Tara Street Dublin 2 D02 VX67 Ireland T: (046) 909 9700

Auditors:

PriceWaterhouseCoopers Spencer Dock, North Wall Quay, Dublin 1 T: (01) 792 6000

Supervisors:

Insurance Supervision Department Central Bank of Ireland New Wapping Street North Wall Quay Dublin 1 T: (01) 224 6000

Exhibit 4 Board of Directors as at 31 December 2020

Name	Position	Nationality	Date Appointed
William Finn	Independent Non-Executive Director	Irish	16 September 2015
Andrew Milton	Independent Non-Executive Director	British	19 June 2018
Tim Madigan	Independent Non-Executive Director	Irish	8 December 2016
Paul Thompson	Non-Executive Director	British	11 November 2014
lan Maidens	Non-Executive Director	British	11 November 2014
Paul Gillett	Executive Director	British	19 June 2018
Henry O'Sullivan	Executive Director	Irish	26 July 2016

Exhibit 5 UHIL Ownership Structure at 31 December 2020 (100% ownership, unless otherwise stated):

UHIL, is a wholly owned subsidiary of UIG Holdings (No 1) Limited ('UIG'), a UK incorporated company specialising in the acquisition and consolidation of life assurance businesses. Its principal business is that of a holding company.

As at 31 December 2020 UHIL owned wholly the following subsidiaries:

Utmost Holdings Ireland Limited Solvency Financial Condition Report Year-End 2020 9/100

Exhibit 6 UHIL Subsidiaries

Subsidiary Name	Nature of Business
Utmost PanEurope dac	Life Insurance
Utmost Services Ireland Limited	Management and Administration Services
Utmost Bermuda Limited	Life Insurance
Harcourt Life Corporation dac	Management Activities

UHIL generated a loss after tax for the 2020 financial year of €21,061k. The key drivers of the result are the reduced amortisation write-off of the UPE AVIF with the performance of the underlying subsidiaries being similar year on year.

UPE Business Operations:

UPE's core business lines are as follows:

- Wealth Solutions: Developing insurance solutions, which are aligned to local fiscal and regulatory laws, which may be tailored to meet the unique and exacting requirements of ultra-high-net-worth clients. These solutions are offered through the development and utilisation of the Company's UK and pan-European network of Private Banking relationships;
- Wealth Accumulation: Offering individuals flexible products for medium to long term financial planning;
- Corporate Solutions: Offering corporate entities alternative and simplified domestic and cross border employee benefit solutions.

Unit-linked income for UPE is in respect of fees which are charged to investment-linked contracts for contract administration services, investment management services, payment of benefits and other services related to the administration of investment-linked contracts. Fees are recognised as revenue for the services provided. Corporate Solutions income is generated from a combination of policy servicing fees and the underwriting performance of existing policies.

Utmost Services Ireland Limited

All UHIL staff, with the exception of certain PCF role holders who are employees of UPE, are employees of USIL. USIL provides UPE with management and administrative services with USIL employees deployed to UPE as required. USIL also provides similar management and administrative services to UBL and UW.

Utmost Bermuda Limited

UBL's principal activity is that of a run off book. UBL specialises in bespoke investment solutions for wealthy individuals in the form of unit linked life assurance policies and a small number of conventional life assurance policies. UBL has been closed to new business since 2004 and dedicated policies account for the majority of the funds under management.

A.2. UNDERWRITING PERFORMANCE

UHIL does not receive any direct gross written premium.

The most significant countries for UPE (by 2020 gross written premium) are Italy, UK, Finland, Spain and Portugal.

Premiums received during the year relate to Wealth Solutions single and regular premiums, and Corporate Solutions premiums. Total 2020 gross written premiums were €1,237,137k.

Exhibit 7 UHIL Consolidated Gross Written Premiums

	31 December 2019	31 December 2020
	€'000	€'000
Gross Written Premiums	1,141,151	1,237,137

Exhibit 8 UPE Consolidated Gross Written Premiums

	31 December 2019	31 December 2020
	€'000	€'000
Gross Written Premiums	914,857	1,237,133

The difference between UHIL and UPE 2020 gross written premium relates to top-ups received by UBL of 4k.

The increase in UPE's 2020 gross written premiums compared to 2019, is mainly due to the transfer of the Selection, Delegation and Generation Planning Bond products into UPE in October 2019 after being acquired by UPE. Only two months of premium was included in the UPE 2019 premium total.

The UPE and UHIL financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the EU and applicable to companies reporting under IFRS at 31 December 2020.

Detailed information on UHIL's premiums, claims and expenses are included in \$.05.01.02 in Section F Quantitative Reporting Templates.

A.3. INVESTMENT PERFORMANCE

The policyholder investments for UHIL are equivalent for those of UPE as policyholder investments reside in the insurance entities UPE and UBL. UHIL does not hold any additional policyholder investments for the benefit of policyholders.

Investments for the Benefit of Life Assurance Policyholders who bear the Investment Risk

The investments linked to insurance policies are selected by policyholders, or their appointed advisers or, where applicable, by asset managers selected by the policyholders and appointed for the purpose by UPE. The value of assets under management is impacted by new business, asset and currency performance, fee deductions and policies maturing or surrendering each year.

Exhibit 9 UPE Investments for the benefit of life assurance policyholders who bear the investment risk

Policyholder Investments	31 December 2019 €'000	31 December 2020 €'000
Investments	15,328,708	15,450,511
Cash balances and short term deposits	1,920,849	1,915,691
Total	17,249,557	17,366,202
Breakdown of Investments		
Bonds	1,877,038	1,759,412
Equities	1,305,494	1,423,394
Funds	11,804,663	11,976,258
Derivatives	3,064	8,862
Other Investments	338,448	282,585
Total Investments	15,328,708	15,450,511

There was no material change in policyholder investments in 2020.

UHIL Financial Investments

UHIL financial investments are primarily bonds, investment funds and investments in subsidiaries owned by the shareholders of the company.

The information contained in Exhibit 10a to Exhibit 11b is provided on an IFRS basis.

Exhibit 10a UHIL Financial and Subsidiary Investments

UHIL Financial Investments	31 December 2019 €'000	31 December 2020 €'000
Financial Assets		
Debt securities – Fair value through profit or loss	94,945	103,071
Debt securities – Amortised Cost	12,507	11,816
Investment Funds	101,101	123,694
Total Financial Assets	208,553	238,581
Property	2	2
Total Company Financial Investments	208,555	238,583

UPE Financial Investments

UPE financial investments are primarily bonds, investment funds and investments in subsidiaries.

Exhibit 10b UPE Financial and Subsidiary Investments

UPE Financial Investments	31 December 2019 €'000	31 December 2020 €'000

Income from financial assets at amortised cost	171	135
Total Investment Income	1,110,856	468,400

A.4. PERFORMANCE OF OTHER ACTIVITIES

Operating expenses for UHIL include administration and finance costs only.

Operating expenses for UPE include acquisition and other commission for direct insurance. The expenses include payroll costs as well as third party administrator related expenditure and office overheads. Depreciation of tangible fixed assets, amortisation of intangible fixed assets, write-off of intangible fixed assets and auditors' remuneration for the audit of the entity's financial statements are also included. Operating costs are charged through the technical account of the statement of comprehensive income.

Business Events During The Year

During 2020 the following key changes to UHIL and UPE's business occurred:

- On 31st December 2020 a special resolution pursuant to Section 202 (1)(a)(i) of the Companies Act 2014 was passed to authorise the reduction of the capital of UPE. As a result of the Capital Reduction the issued share Capital at 31 December 2020 was €18,757,332 (2019 : €91,134,868) and Authorised Share Capital €750,000,000 (2019 : €750,000,000).
- On 31st December 2020 a special resolution pursuant to Section 202 (1) (a) (i) of the Companies Act 2014 was passed to authorise the reduction of the capital of UHIL. As a result of the Capital Reduction the issued share Capital at 31 December 2020 was € 187,850 (2019 : € 187,850,001) and Authorised Share Capital €300,000,000 (2019 : €300,000,000).
- Contractual arrangements were put in place with UL to provide services to approve UPE's Financial Promotions for its Wealth Solution books of business in the UK market.

In December 2020 the UPE 2021-2025 Strategic Plan was presented to and approved by the Board.

Dividends

No dividend payments were received by or paid by UHIL during 2020.

No dividend payments were received by or paid by UPE during 2020. However, on 26th March 2021, the Directors of HLC agreed a final dividend of €7,850,000 to be paid to UPE.

Leasing Arrangements

UHIL, UPE and USIL have no material operating leases and no financial leases in place.

A.5. ANY OTHER INFORMATION

Brexit:

The UK left the European Union on 31st January 2020 with a withdrawal agreement. In the final week prior to the end of the transition period (ending 31st December 2020) a trade deal was negotiated between the UK and the EU. However, the deal does not address the cross-border Financial Services sector in any meaningful way. Nevertheless, UPE understands there will be ongoing discussions between the UK and the EU in this area, with a commitment to work towards a 'memorandum of understanding' on regulatory co-operation.

UPE no longer sells into the UK under the EU Freedom of Services Provisions. During the transition period, UPE had put contingency measures in place to continue to offer its solutions in the UK notwithstanding that it no longer has access to UK insurance markets through the use of passporting rights.

COVID-19

Despite the impact of COVID-19 on the broader economy and society the Company's capital position remains strong. As set out in this document, the Company is capitalised to withstand severe but plausible events, and our annual Own Risk and Solvency Assessment ("ORSA") process includes multiple adverse scenarios, including from events such as a pandemic. The Company understands that this is a challenging time for everyone and will continue to ensure that the safety and welfare of colleagues and customers is priority at all times.

Fitch Rating

On 30 April 2020 Fitch Ratings affirmed the Insurer Financial Strength Rating of UPE at 'A' (Strong) with a Stable Outlook. The rating affirmation are based on Fitch's current assessment of the impact of the coronavirus pandemic.

Sustainability

The Utmost Group launched its Sustainability Strategy in February 2021. Utmost Group is dedicated to making a positive difference. In order to continue to meet the needs of clients and attract investors who share our long-term philosophy – as well as it being an overall good – sustainability has become central to our strategy. Our sustainability strategy supports our vision by delivering positive benefits to our stakeholders and embedding sustainability across our business. Our sustainability strategy is framed along four pillars: our customer outcomes, responsible investments, our environmental impact and engagement in our community. The Utmost Group CEO has overall accountability for the delivery of our sustainability strategy, which is implemented by our Sustainability Working Group which includes senior representatives from across the business, and ensuring we do business in the right way. As regulations and client expectations evolve, our strategy will be regularly revisited in order that we maximise our positive impact.

Post Balance Sheet Events

On 1 April 2021, Utmost Isle of Man agreed to acquire the Quilter International business, a highly complementary business to the existing Utmost International business, from Quilter plc. The acquisition continues the expansion of the Utmost International business and further strengthens its global footprint. Total cash consideration of £483m is expected to be paid to Quilter plc by Utmost Isle of Man assuming a completion date for the transaction of 31 December 2021. Whilst the bulk of the Quilter International business consists of Isle of Man based companies, it also includes a small Irish life company, Quilter International Ireland dac, which had Own Funds of £48m at 31 December 2020. The UPE board has agreed that UPE should acquire Quilter International Ireland dac for £40m immediately post the initial acquisition by Utmost Isle of Man. A gain on bargain purchase is expected to be recognised in the UPE financial statements for the year ending 31 December 2021, this will be determined after completion of the acquisition by UPE.

B. System of Governance

The UHIL Board of Directors in seeking to apply best practice in corporate governance periodically establishes committees to help it discharge its responsibilities in respect of the regulated entities. The Directors are satisfied that there is sufficient oversight of the Group's activities through the establishment of Audit Committees and other Board sub-committees by its principal subsidiary undertakings, such that committees are not also required at the UHIL level.

The information provided on the System of Governance will be primarily based on the governance structures in place within the authorised subsidiary, UPE.

B.1. GENERAL INFORMATION ON THE SYSTEM OF GOVERNANCE

Corporate Governance represents the sum of the methods, models and planning, management and control systems that are required for the operation of UPE's governing bodies.

UPE's Corporate Governance is based on a number of cornerstones, such as the central role played by the Board, the correct management of situations that present conflicts of interest, transparency in disclosing decisions regarding the management of UPE, and the effectiveness of the Internal Control and Risk Management System.

B.1.1. INFORMATION ON GENERAL GOVERNANCE

Risk governance is aimed at establishing an effective organisational structure based on a clear definition of risk roles and responsibilities, and on a set of policies, standards and operating procedures.

On an annual basis a detailed assessment of the System of Governance in place in UPE is undertaken against the European Insurance and Occupational Pensions Authority ("EIOPA") Guidelines on System of Governance. This assessment is then presented to the Risk and Compliance Committee. The most recent assessment was presented to the Risk and Compliance Committee in October 2020 and it was concluded that the System of Governance in place in UPE is appropriate and proportionate to the risks faced by UPE and the Utmost Ireland Group of Companies and supporting evidence and documentation is in place to demonstrate the effective operation of the three lines of defence.

As part of its governance structure, the UPE Board has established a series of Board Committees with specific delegated authorities.

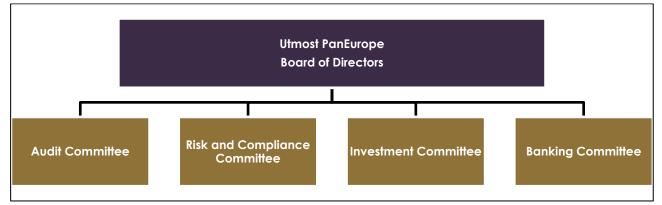

Exhibit 12 UPE Governance Structure

The remit of each of the Committees outlined above is set out in their respective Terms of Reference which are subject to annual review and approval. Furthermore, the performance of each Committee is subject to annual review.

It is noted that the Human Resources and Remuneration Committee is a Committee of the UHIL Board.

Key Role	Description
Board of Directors	The Board ensures that the Risk Management system identifies, evaluates and controls the most significant Company risks. Within the scope of its typical duties and responsibilities, the Board is ultimately responsible for setting strategies and policies in the area of Risk Management and internal control and ensuring their adequacy and sustainability over time, in terms of completeness, functioning and effectiveness. The Board has established the following Board committees: the Audit Committee, the Risk and Compliance Committee, the Investment Committee and the Banking Committee. In addition, UPE has established a Management Committee. Details on the Board Committees are provided below.
Audit Committee	The Audit Committee takes delegated responsibility on behalf of the Board for ensuring that there is a framework for accountability, examining and reviewing systems and methods of financial control and for ensuring UPE is complying with its constitutional documents together with all aspects of the law and relevant regulations.
Risk and Compliance Committee	The Risk and Compliance Committee has been established by the Board in order to provide leadership, direction, and oversight with regard to UPE's policies and procedures, including those relating to Risk Management and Legal and Compliance. It assists the Board of Directors in fulfilling its Risk Management responsibilities as defined by applicable law and regulations, UPE's constitutional documents and internal regulations as well as considering leading market practice standards.
Investment Committee	The Investment Committee has delegated responsibility for recommending overall strategic investment policy to the Board, and for undertaking oversight of investment activities, seeking to ensure that these are consistent with the approved Investment Policy.
Banking Committee	The Banking Committee is responsible for opening, change in purpose, or closure of all master custodian and corporate bank accounts in the name of UPE. The Committee is also responsible for the review and approval of appointments to the authorised signatory list and their levels of authorisation and approval.

Exhibit 13 UPE Board Committees

B.1.2. INFORMATION ON RISK MANAGEMENT, INTERNAL AUDIT, COMPLIANCE AND ACTUARIAL FUNCTIONS INTEGRATION INTO THE ORGANISATIONAL STRUCTURE AND THE DECISION MAKING PROCESSES OF THE UNDERTAKING, STATUS AND RESOURCES OF THE FUNCTIONS WITHIN THE UNDERTAKING

In accordance with local laws and Solvency II requirements, UPE has established a Risk Management System which is defined as a set of strategies, standards, processes and procedures aimed at identifying, measuring, monitoring and reporting on a continuous basis the risks to which UPE is exposed.

Risk governance is aimed at establishing an effective organisational structure based on a clear definition of risk roles and responsibilities, and on a set of policies, standards and operating procedures.

In addition, as part of its governance structure UPE has established a series of Board Committees with specific delegated authorities (as outlined within Section B.1.1 of this report).

The Internal Control and Risk Management System is put in place within UPE through a specific on-going process which involves, with different roles and responsibilities, the Board, ExCo and the organisational structures. The functions involved in the risk management process operate according to the Three Line of Defence approach:

- The operational structures (risk owners) are the First Line of Defence. The risk owners are ultimately
 responsible for risks concerning their area and to define and update the actions needed to make their
 risk management processes effective and efficient. They control the activity of the risk takers, who deal
 directly with the market and the internal and external parties and who define activities and programs
 from which risks may arise. The risk management initiatives defined by the risk owners address the way
 risk takers undertake risks. In addition, there are a number of support units (e.g. Actuarial) and oversight
 committees (risk observers) responsible for constantly monitoring specific risk categories, in order to
 measure and analyse them and to identity risk mitigation actions to the risk owners.
- The Risk Management, Legal and Compliance and elements of the Actuarial Function represent the Second Line of Defence. The Risk Management Function oversees the whole Risk Management System ensuring its effectiveness. It supports the Board and ExCo in defining the Risk Strategy and in the development of the methodologies to identify, take, assess, monitor and report risks. It also supports the operating units implementing and adopting the relevant policies and standards. The Head of Outsourcing (reporting directly to the Chief Risk Officer ("CRO")) is responsible for the overall execution of the outsourcing lifecycle; from the risk assessment to the final management of the agreement and subsequent monitoring activities. The Legal and Compliance Function is in charge of evaluating whether the internal processes are adequate to mitigate compliance risk. The Actuarial Function, through the Head of the Actuarial Function ("HoAF"), challenges the contents and assumptions of the ORSA and provides an assessment on the range of risks, the adequacy of stress scenarios and the appropriateness of the financial projections included within the ORSA process and prepares the annual Actuarial Function Report.
- Internal Audit is the Third Line of Defence. Internal Audit is responsible for independently evaluating the effectiveness of the Internal Control and Risk Management System and for confirming the operational effectiveness of the controls.

The roles and responsibilities of each of the control functions (Risk Management, Legal and Compliance, Actuarial and Internal Audit) and how they interact with the organisation in the execution of that responsibility are set out in their respective charters. The role of the Head of Outsourcing is articulated in the Outsourcing Policy.

As outlined in the Risk Management Policy, the Risk Management Function acts as guarantor for the effective implementation of the risk management system, as required by law and as established by the Board.

The Risk Management Function supports the Board and ExCo in the definition of the risk management strategy and the development of tools for risk identification, monitoring, management and reporting.

B.1.3. INFORMATION ON AUTHORITIES, RESOURCES PROFESSIONAL QUALIFICATIONS, KNOWLEDGE, EXPERIENCE AND OPERATIONAL INDEPENDENCE OF THE FUNCTIONS AND HOW THEY REPORT TO AND ADVISE THE ADMINISTRATIVE, MANAGEMENT OR SUPERVISORY BOARD OF THE INSURANCE UNDERTAKING

UHIL has no directly employed employees and no PCF or Controlled Functions ("CF") individuals. UPE employees who are identified as holding PCF are all degree and/or professionally qualified. UPE relies on USIL for the provision of its business operations. The majority of USIL employees are degree and/or professionally qualified and all persons identified as holding PCF or CF in USIL are reviewed annually to ensure they meet the Central Bank of Ireland ("CBoI") Fit and Proper requirements.

B.1.4. MATERIAL CHANGES TO THE SYSTEM OF GOVERNENCE

There were no changes to the membership of the UPE Risk and Compliance Committee or ExCo during 2020.

There were no changes to the membership of the Board of Directors of UPE and UHIL during 2020.

It is noted that Mike Davies was appointed to the UPE Board of Directors on the 19th January 2021. A number of changes to the UPE Board composition is expected during 2021 due to the term expiration of a number of Board members.

No other material changes to the System of Governance occurred during the year-ended 31 December 2020.

B.1.5. REMUNERATION POLICY

The remuneration strategy is based on the following principles, which guide the remuneration programmes and consequent actions:

- All staff are rewarded on the basis of both their individual role and contribution to the delivery of the business strategy.
- It is recognised that financial reward is only one aspect of staff recruitment and retention. The development of talent through non-financial measures, including training and education, is also beneficial and important.
- A performance management process that seeks to encourage performance improvement whilst supporting career development is in place.
- Remuneration packages offer competitive market rates for base pay, variable reward and benefits for all employees.
- Roles and performance are evaluated by Management on a fair and transparent basis which, while taking account of the different specialisms within UPE, seek to apply a consistent and objective methodology.
- Budget and cost discipline is determined on an annual basis subject to overall budget.
- Remuneration and supporting structures promote sound and effective risk management, including CRO review of annual bonus scheme structures.

Balanced Remuneration Package

UPE (via USIL) offers a remuneration package which is proportional in its fixed components, variable components and benefits. It provides an appropriate balance with regard to the variable remuneration for short-term and medium to long-term contracts, in order to avoid adoption of conduct that favours short-term results over medium to long-term goals. The remuneration package is fair and competitive, anticipating the adoption of alternative or additional monetary solutions, such as benefits, with a view to optimising the efficiency of interventions in financial terms. UPE (via USIL) provides employees with pension benefits through a defined contribution pension scheme. Employer and employee pension contribution rates are based on the employee job grades.

Target Setting and Appraisal

Each year the Board defines specific targets, both financial and non-financial, against which performance, and thus any bonus payable, is measured.

UPE's goals and objectives are cascaded to all functions and individual employee goals are established and evaluated annually.

B.1.6. MATERIAL TRANSACTIONS DURING THE REPORTING PERIOD

Please refer to section B.1.4 regarding appointments and resignations during the year.

Please refer to section A.4 for material business activities identified during the year.

B.2. FIT AND PROPER REQUIREMENTS

A core component of an effective risk culture is the knowledge and skills of UPE employees. In order to confirm that the right resources and skills are in place, UPE has implemented a Fit and Proper Policy and related procedures in order to assess the fitness and probity both initially and on an on-going basis of the individuals who are performing key functions. The policy and procedures has been developed in line with the Solvency II Directive and the associated CBoI Fitness and Probity standards.

B.2.1. DESCRIPTION OF THE SPECIFIC REQUIREMENTS CONCERNING SKILLS, KNOWLEDGE AND EXPERTISE REQUIRED

The Board of UPE has adopted a Fit and Proper Policy in order to define the minimum standards to be applied in terms of fitness and probity to all relevant personnel identified in the Policy.

The Fit and Proper Policy also defines the procedure for assessing the fitness and probity of the relevant personnel (both when being considered for the specific position and on an ongoing basis), and a description of the situations that give rise to a re-assessment of the abovementioned fit and proper requirements. The Human Resource ("HR") Function undertakes due diligence of all persons identified under the Fit and Proper standards to ensure they can perform their duties by carrying out the following assessments of being Competent and Capable, Honest, Ethical and Act with Integrity and Financial Soundness.

The fitness and probity annual self-declaration process and annual background checks are carried out and assessed by the HR Function.

In addition, there is an annual statement of compliance attested to by the CEO, and submitted as part of the annual return process to the CBoI. There is also the annual PCF Confirmation Return, submitted by the Compliance Function to the CBoI via ONR.

The skill set of the Board and Board Committees is reviewed regularly.

B.2.2. PROCESS FOR ASSESSING THE FITNESS AND THE PROBITY OF THE PERSONS

The CBol has identified a number of PCF roles for which prior approval of the role holder by the CBol is required.

Pre-Approval Controlled Functions Roles

Exhibit 14 UPE Pre-Approval Controlled Functions Roles

Code	Definition
PCF1	Executive Director
PCF2	Non-Executive Director
PCF3	Chairman of The Board of Directors
PCF4	Chairman of the Audit Committee
PCF5	Chairman of the Risk and Compliance Committee
PCF8	Chief Executive Officer
PCF11	Head of Finance
PCF13	Head of Internal Audit
PCF14	Chief Risk Officer
PCF15	Head of Compliance with responsibility for AML
PCF18	Head of Underwriting
PCF19	Head of Investment
PCF42	Chief Operations Officer
PCF43	Head of Claims
PCF48	Head of Actuarial Function

Controlled Functions Roles

In addition to the above, an assessment of roles which are classified as a CF is completed. UPE is required to undertake due diligence on each CF and the Fitness and Probity requirements are applicable to all staff. The following CF roles are applicable to UPE:

Exhibit 15 Controlled Functions Roles

Code	Definition
	A Chairman of a Committee
CF1	Company Secretary
	Executive Committee of UPE
	Executive Committee of UPE
CF2	All Heads of Departments
	Senior Management
CF4	Sales Staff who work in UCS
CF5	Assigned to staff members who assist customers in the making of a claim. This is limited to Pension
	Administrators and their managers.
CF6	Assigned to staff members who determine the outcome of a claim. This includes both Claim
Specialists and Pension Administrators, and their managers.	
CF7	Operations Manager, CCS
	Corporate Solutions Operations Manager
	Head of Operations, CCS
CF8	Head of Legal and Compliance
	Qualified members of the Legal and Compliance Team
CF10	Corporate Customer Services Team Leaders
CF11	Middle to Senior Finance employees

HR manage the ongoing maintenance of employee data as it relates to Fitness and Probity, through the PCF and CF process.

B.3. RISK MANAGEMENT SYSTEM INCLUDING THE OWN RISK AND SOLVENCY ASSESSMENT

B.3.1. RISK MANAGEMENT SYSTEM

As outlined in the UPE Risk Management Policy, the Risk Management Function acts as guarantor for the effective implementation of the Risk Management System, as required by law and as established by the Board. The UPE Risk Management Function supports the Board and ExCo in the definition of the Risk Management strategy and the development of tools for risk identification, monitoring, management and reporting.

Risk Management Function

The Risk Management Function is separate from the operational business units and does not have operating responsibilities or a direct reporting line to those responsible for the operating activities. The independence of the Risk Management Function is guaranteed through its direct reporting line to the Risk and Compliance Committee. The structure of the function, including its reporting lines and its relationship with the various committees that perform risk management tasks are set out below.

The Risk Management Function consists of the CRO supported by a Risk Manager, two Risk Specialists (one on secondment), an Internal Control Analyst and an Intermediary Monitoring Analyst. The Head of Outsourcing also reports to the CRO and is supported by two outsourcing analysts. The CRO reports to the Board and has a dotted reporting line to the CEO on operational issues. The diagram below illustrates the Risk Management structure and reporting lines:

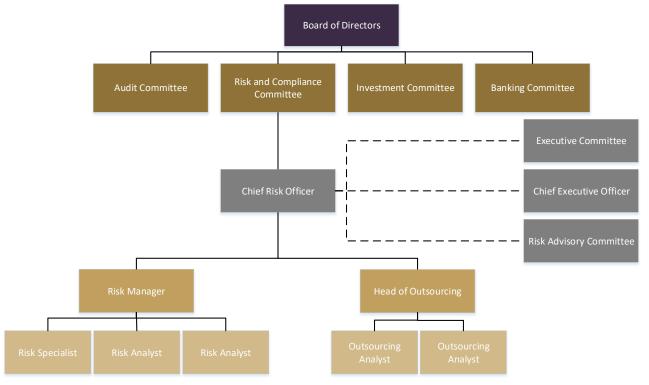

Exhibit 16 Risk Management Structure and Reporting Lines

The Risk Management Function oversees the sustainability of the risk management system. The Risk Management Function supports the Board, ExCo and departmental managers in defining risk management strategies and the instruments to monitor and measure risks, providing, through an appropriate reporting system, the elements for an assessment of the performance of the risk management system as a whole. The Risk Management Function is responsible in particular for the following activities:

- Defining the risk measurement methodologies and models.
- Cooperating, with the Risk Owners, on the definition of the operating limits attributed to the operating structures and on the definition, with the first level functions (i.e. senior management) in charge of control, of the procedures for the prompt verification of such limits.
- Validating the information flows, prepared by the various Risk Owners, necessary to ensure the timely control of risk exposures and the prompt identification of any operational anomaly.
- Presenting appropriate reports to the Board and the Risk and Compliance Committee on the overall performance of the risk control and management system and its ability, in particular, to react to context and market changes, as well as on the development of risks and any instances in which the operating limits have been exceeded.
- Ensuring that the ExCo reacts to results from the stress tests if unexpected events or results are identified.

The Risk Management, Legal and Compliance and Internal Audit Functions are operationally independently from ExCo and have unfettered access to the Board.

Policy Framework

The documentation tree is structured into:

- First Level Policies (required by art.41 of the Solvency II Directive and approved by the Board).
- Second Level Policies approved by the Board.

Utmost Holdings Ireland Limited Solvency Financial Condition Report Year-End 2020 23/100

- Standards.
- Operating Procedures.

Risk Management System

The purpose of the Risk Management System is to ensure that all risks to which UPE is exposed to are properly and effectively managed on the basis of the risk strategy defined, following a set of processes and procedures and based on clear governance provisions.

The principles defining the Risk Management System are provided in the Risk Management Policy, which is the cornerstone of all risk-related policies and standards. The Risk Management Policy outlines all risks UPE is exposed to, on a current or forward-looking basis.

UPE's Risk Management process is defined in the following phases:

Exhibit 17 Risk Management Process

1. Risk Identification

The purpose of the risk identification phase is to ensure that all material risks to which UPE is exposed are properly identified. For that purpose, the Risk Management Function interacts with the main Business Functions in order to identify the main risks, assess their importance and ensure that adequate measures are taken to mitigate them according to a sound governance process. Within this process, emerging risks are also taken into consideration.

Based on Solvency II risk categories, and for the purpose of SCR calculation, risks are categorised according to the Risk Map below.

Financial Risks	Credit Risks	Insurance Risks	Other Risks
Interest Rate Yields	Credit Default	Mortality CAT	Operational
Interest Rate Volatility	Counterparty Default	Mortality no CAT	Liquidity
Equity Price		Longevity	Strategic
Equity Volatility		Morbidity/Disability	Reputational
Currency		Life Lapse	Contagion
Concentration		Expense	Emerging
Property		Health CAT	Regulatory / Compliance
Spread		Health Claim	Conduct

Exhibit 18 Risk Map

2. Risk Measurement

UPE has formally adopted a number of risk assessment methodologies.

In compliance with Solvency II regulation, the SCR is calculated based on the EIOPA Standard Formula. On an annual basis UPE completes an appropriateness assessment of the Standard Formula against UPE's risk profile.

3. Risk Management and Control

UPE operates a sound Risk Management System in line with the established strategy and processes. To ensure that the risks are managed according to the risk strategy, UPE follows the governance defined in the Risk Appetite Statement ("RAS") and Risk Management Governance and Control Framework. This provides a framework for Risk Management embedding in day-to-day and extraordinary business operations, control mechanisms as well as escalation and reporting processes.

The purpose of the RAS is to set the desired level of risk (in terms of risk appetite and risk preferences) and limit excessive risk-taking. Tolerance levels on the basis of capital and liquidity metrics are set accordingly. Should an indicator approach or breach the defined tolerance levels, escalation mechanisms are then activated.

4. Risk Reporting

Risk monitoring and reporting is a key risk management process which allows Business Functions, ExCo, Board and also the CBoI to be aware of, and informed about, the risk profile development, risk trends and any breaches of risk tolerances.

Risk factors are taken into consideration in the following decision making processes: Strategic Planning Process; Capital Allocation and Management; Asset Liability Matching and Investments; Solvency, Liquidity and Funding; Product Pricing, Development and Monitoring; Management Information; and Performance Management.

Risk Culture

A core objective of the Risk Management Function is to embed a positive and open risk management culture within UPE. In support of this objective, risk management and compliance training is provided to all new staff. In addition, the following structures have been established in order to embed a risk culture within UPE:

- ExCo, supported by the Risk Management Function, meet regularly to review risk management issues and to integrate risk management thinking into the decision making process. Furthermore, material risk incidents and the results of risk assessments are reviewed, resulting in the required corrective actions being identified; and
- The Risk Management Function meet regularly with key departments to discuss Operational Risk.

The risk culture is further embedded within UPE through the following:

- The CRO is a member of ExCo and in the execution of his role integrates risk management thinking into the decision making process.
- The strategic planning process must remain consistent with the ORSA in order to include a risk based forward-looking view in the development of the strategic plan.
- The Risk Management Function is involved in the material initiatives which may impact on the risk profile of UPE. The role of the Risk Management Function is to integrate the risk management assessment methodologies into the decision making process by supporting the business in identifying, assessing and managing the risks associated with these initiatives.
- The Risk Management Function meet, on at least a monthly basis, with the First Line of Defence to discuss core Risk Management activities.
- The Risk Management Function works closely with the business units providing advisory services.

B.3.2. INTERNAL MODEL FRAMEWORK: GOVERNANCE, DATA AND VALIDATION

This section is not applicable to UHIL.

B.3.3. ORSA PROCESS

UPE has prepared an ORSA since 2014. UHIL prepared its first ORSA in Q2 2020. The ORSA process is a key component of the Risk Management System which is aimed at assessing the adequacy of the solvency position and the risk profile on a current and forward-looking basis.

The ORSA process documents and assesses the main risks UHIL is exposed to, or might be exposed on the basis of its Strategic Plan. It includes the assessment of the risks in scope of the SCR calculation, but also the other risks not included in SCR calculation. In terms of risk assessment techniques, stress test and sensitivity analysis are also performed with the purpose of assessing the resilience of UHIL risk profile to changed market conditions or specific risk factors.

The ORSA Report is produced on an annual basis. The most recent UHIL ORSA Report was approved by the Board of Directors in June 2020. In addition to the annual ORSA Report, a non-regular ORSA Report will be produced if the risk profile of UPE or UHIL changes significantly.

All results are documented in the ORSA Report and which is reviewed by the Risk and Compliance Committee and the Board. After discussion and approval by the Board, the ORSA Report is submitted to the CBol. The information included in the ORSA Report is sufficiently detailed to ensure that the relevant results can be used in the decision-making process and business planning process.

UHIL and UPE's risk profile, including ORSA triggers which would prompt the undertaking of a non-regular ORSA Report, is monitored on an ongoing basis and reported to the Risk and Compliance Committee quarterly.

The Head of Actuarial Function provides an actuarial opinion on the ORSA. The opinion addresses the following areas:

- The range of risks and the adequacy of stress scenarios considered as part of the ORSA process.
- The appropriateness of the financial projections included within the ORSA process.
- Whether the undertaking is continuously complying with the requirements regarding the calculation of Technical Provisions and potential risks arising from the uncertainties connected to this calculation.

B.3.4. RISK EMBEDDING IN CAPITAL MANAGEMENT PROCESS

Capital management, strategic planning and risk management are strongly integrated processes. This integration is deemed essential to ensure alignment between business and risk strategies.

Through the ORSA process, the projection of the capital position and the forward-looking risk profile assessment contributes to the Strategic Planning and Capital Management process.

The ORSA Report also leverages on the Capital Management Plan to verify the adequacy, including the quality, of the Eligible Own Funds to cover the overall solvency needs on the basis of the plan assumptions.

To ensure the on-going alignment of the business strategy to UPE's risk appetite, the Risk Management Function actively supports the strategic planning process. This process includes strategy discussions, initiatives to be implemented, monitoring the business performance and oversight on risk and capital positions.

B.4. INTERNAL CONTROL SYSTEM

The Internal Control and Risk Management System, whose design and structure is approved by the Board, is the system in place to ensure that business activity complies with the law and with the various directives and procedures in place. It also ensures that UPE's processes are efficient and effective and that accounting and management information is reliable and complete.

Internal control comprises a set of tools that helps UPE reach its targets in line with the level of risk selected by ExCo and the Board. Such targets are not restricted solely to business targets, but extend also to those connected with financial reporting as well as compliance with all internal and external rules and regulations, and take on varying importance depending on the risk that has been identified. It follows that the relevant internal control mechanisms take on a varying nature and form too, depending on the particular process or processes under the examination.

It is the responsibility of the Board to encourage the development and spread of the 'culture of control', requiring senior management to make all staff aware of the importance of internal controls and the role that they play, as well as the added value that they represent to the business. Senior management is responsible for implementing both the 'culture of processes' and the 'culture of control' together with ensuring that employees are made aware of their individual roles and responsibilities regarding internal controls. The system of delegated powers and procedures governing the allocation of duties, the operating processes and the reporting channels is duly formalised and employees are sufficiently informed and receive adequate training in relation to such systems.

The effectiveness of the control mechanisms listed above is delivered not only by means of monitoring and control activities carried out throughout the entire organisational structure of the business, but also via suitable channels for reporting any breaches.

As a result, UPE's internal controls are organised on the basis of various operational levels and levels of responsibility, these being regulated and codified:

- The controls that are the duty of the organisational units that form an integral part of each company process and represent the basis of the internal control system.
- The controls carried out by the corporate functions whose main activity is to perform control tasks. These include:
 - The Risk Management Function, which controls the risk profile of UPE and compliance by management with the limits established by the Board and senior management;
 - The Legal and Compliance Function, which represents an additional and independent Line of Defence within the Internal Control and Risk Management System overall, being responsible for assessing whether the organisation of the insurance business and its internal procedures are sufficient to prevent the risk of incurring penalties for regulatory offences or penalties imposed by law and the risk of suffering financial losses or reputational harm to the corporate image of UPE as a result of a breach of the law, of regulations or of measures imposed by the supervisory authorities or self-regulatory provisions
 - The budgeting and controlling activities, with the aim of observing and analysing business performance as far as meeting the targets established at the planning stage is concerned, demonstrating, by measuring specific indicators, any variance between the targets established at the planning stage and performance, and identifying any unusual changes;
 - The Compliance activities in fraud prevention, which work to prevent both internal and external fraud and to identify and suppress the same; and
 - The various inspectorate bodies, which within the sales and claim settlement networks mainly conduct inspections for the supervision, control and monitoring of certain operational areas or some provision of services.

Utmost Holdings Ireland Limited Solvency Financial Condition Report Year-End 2020 27/100

In addition, there are other non-operational functions which, in providing advice to other corporate functions, assist in implementing all internal control objectives (tax advice, advice on privacy issues, legal counsel, etc.).

• The independent assessment carried out by Internal Audit of the quality and effectiveness of the controls put in place by the other corporate functions.

B.4.1. INTERNAL CONTROL FUNCTIONS

The UPE Risk Management, Legal and Compliance and Internal Audit Functions operate within the framework of specific policies that are subject to periodic updates and approval by the Board. Specific regulations stemming from these policies govern in some detail the activities to be performed as part of the specific mission assigned, as well as the powers and responsibilities allocated by the Board. Legal and Compliance and Risk Management Functions are involved where new material processes are drawn up and where changes are made to the organisational structure of the business. In particular, the Legal and Compliance Function must always be involved in the drafting of processes where the issue of compliance is relevant.

B.4.2. LEGAL AND COMPLIANCE FUNCTION

UPE has established a Legal and Compliance Function with the primary aim of facilitating the development of a compliance culture across the business. In this context, one of the core responsibilities of the Legal and Compliance Function is to reinforce and promote ethical standards of behaviour and compliance awareness within UPE.

The Legal and Compliance Function seeks to achieve this objective through the delivery of training to the Board and UPE staff relating to key compliance risks including:

- Anti-Money Laundering ("AML") and Counter Terrorism Financing ("CTF");
- Data Protection, including General Data Protection Requirements;
- Code of Conduct;
- Financial Sanctions;
- Anti-Fraud;
- Conflicts of Interest;
- New laws and regulations (upstream risk);
- Processes for the management of obligations arising out of contracts; and
- Managing claims and obligations arising from actual and potential/threatened legal claims and litigation.

The Legal and Compliance Function works closely with the business in order to assist in identifying, assessing and managing compliance and legal risks. Through the facilitation of dedicated training and working closely with the business, the Legal and Compliance Function promotes a positive compliance culture within UPE.

The Head of Legal and Compliance reports to the Board and Risk and Compliance Committee and has a dotted reporting line to the CEO on operational issues. The Legal and Compliance Function is operationally independent from ExCo and has unfettered access to the Board.

UPE's Legal and Compliance Function monitors compliance with all corporate legal and regulatory requirements which apply to its business activities. These requirements include current legislation, regulations, regulatory standards and codes of practices. The scope of the requirements embraces both the country of establishment where UPE is regulated and supervised and also the countries of sale where its products are distributed to customers.

To support this process, the Compliance Function presents a Compliance Monitoring Plan to the Risk and Compliance Committee and assesses progress against the plan on an ongoing basis. The Legal and Compliance Function conducts routine monitoring and surveillance over the First Line of Defence and reports the results to the Risk and Compliance Committee. The monitoring completed includes the following:

- AML and CTF: Conducting reviews of policyholder documentation for AML and CTF purposes. Performing AML and CTF risk assessments.
- Transaction Monitoring: Monitoring transactions for potentially suspicious activity and filing STRs.
- Regulatory and legislation monitoring: Monitoring and recording legislative requirements and conduct of business obligations that apply to UPE.
- Data Protection: Conducting Data Protection monitoring and risk assessments, and General Data Protection Regulations related obligations
- Online Training: Rolling out companywide training in areas such as Anti Money Laundering, Data Protection and supporting the Code of Conduct training.
- Legal cases: Monitoring and reporting on-going and recently closed legal cases.
- Complaints: Monitoring and reporting on complaints.
- Financial Sanctions: Monitoring by the Head of Financial Crime.

B.5. INTERNAL AUDIT FUNCTION

The Group Internal Audit Function ("GIAF") is an independent, effective and objective function established by the Group's Board to examine and evaluate the adequacy, functioning, effectiveness and efficiency of the internal control system and all other elements of the system of governance, with a view of improving the efficacy and efficiency of the internal control system, of the organization and of the governance processes. This is set out in the Internal Audit Policy and Charter. The Internal Audit Policy and Charter was presented and approved by the Board of Directors at its December 2020 meeting.

The GIAF supports the Board in identifying the strategies and guidelines on internal control and risk management, ensuring they are appropriate and valid over time and provides the Board with analysis, appraisals, recommendations and information concerning the activities reviewed. GIAF also carries out assurance and advisory activities for the benefit of the Board, the Top Management and other departments.

GIAF's authority is enshrined in the Internal Audit Charter which is reviewed annually. Per the Internal Audit Charter, the GIAF has full, free, unrestricted and timely access to any and all the organisation's records, physical properties, and personnel pertinent to carry out any engagement, with strict accountability for confidentiality and safeguarding records and information.

The GIAF governs via the Utmost Internal Audit methodology. This methodology is aligned with the Institute of Internal Auditors' mandatory guidance including the Definition of Internal Auditing, the Code of Ethics, and the International Standards for the Professional Practice of Internal Auditing (Standards). This mandatory guidance constitutes principles of the fundamental requirements for the professional practice of auditing and for evaluating the effectiveness of the audit activity's performance. Given the delicate and important nature of the assurance role carried out within the business, all the personnel of the GIAF must have specific fit and proper requirements as requested by the Company's Fit and Proper Policies.

The activity of GIAF remains free from interference by any element in the organization, including matters of audit selection, scope, procedures, frequency, timing, or report content to permit maintenance of a necessary independent and objective mental attitude. On an annual basis the Group Head of Internal Audit ("GHoIA") confirms his independence and that of the GIAF to the Audit Committee.

On an annual basis, the GHoIA presents a proposed 12-month Internal Audit plan to the Audit Committee

requesting approval.

This plan is developed based on an audit universe using a risk-based methodology, taking into account all past audit activities, the complete System of Governance output, the expected developments of activities and innovations and including input of Top management and the Board. The GHolA reviews the Internal Audit plan on an ongoing basis and adjusts the plan in response to changes in the organisation's business, risks, operations, programs, systems, controls and findings. This review is informal and any change to the Internal Audit plan is first approved by the Chair of the Audit Committee.

Following the conclusion of each Internal Audit engagement, a written audit report is prepared and issued to the auditee and the auditee's hierarchy. The GHoIA, on a quarterly basis, provides the Audit Committee with a report on activities, status of open and overdue audit issues, any significant issues and audit reports issued during the period. However, in the event of any particularly serious situation, such as the emergence of a conflict of interest, the GHoIA will immediately inform the Audit Committee and Board.

B.6. ACTUARIAL FUNCTION

The Actuarial Function within UPE performs the specified tasks as set out in Article 48 of the Solvency II Directive.

The key statutory responsibilities of the Actuarial Function under Article 48 of the Solvency II Directive are to review and validate the calculation of the Technical Provisions, to provide opinions on the underwriting and reinsurance policies and to assist the Risk Management Function with certain tasks. In addition to this, the Actuarial Function has a number of other responsibilities to support the business that are not specified under Solvency II, e.g. support for ORSA process, business planning, provision of management information, risk reporting etc.

The Actuarial Function is led by the HoAF, who reports to the UPE Chief Financial Officer ("CFO"). The HoAF also has direct access to the UPE Board.

The Actuarial Function is responsible for the following activities under Solvency II:

- Coordinating the calculation of technical provisions;
- Ensuring the appropriateness of the methodologies and underlying models used as well as the assumptions made in the calculation of technical provisions;
- Assessing the sufficiency and quality of the data used in the calculation of technical provisions;
- Comparing best estimates against experience;
- Informing the Board of the reliability and adequacy of the calculation of technical provisions;
- Overseeing the calculation of technical provisions in the cases where approximations need to be used due to insufficient and/or inadequate data;
- Expressing an opinion on the overall underwriting policy;
- Expressing an opinion on the adequacy of reinsurance arrangements; and
- Contributing to the effective implementation of the risk management system referred to in Article 44, in particular with respect to the risk modelling underlying the calculation of the capital requirements in the ORSA.

The Board receives an annual report from the HoAF which assesses the adequacy, appropriateness and reliability of technical provisions, underwriting, reinsurance, contributions to Risk Management and conflicts of interest. The report identifies any deficiencies or areas for improvement and provides recommendations as to how such improvements could be implemented.

The Actuarial Function works very closely with the UPE Risk Management Function in UPE and has contributed to

Utmost Holdings Ireland Limited Solvency Financial Condition Report Year-End 2020 30/100

the Risk Management System in the following ways:

- Contributed to and reviewed UPE's ORSA policy and provided feedback to UPE's CRO.
- Provided quantitative analysis to support the ORSA process.
- Reviewed UPE's ORSA reports and provided feedback to the CRO on these reports, in particular on the range of risks and adequacy of the stress scenarios. This activity is now officially part of a wider local regulatory requirement for the HoAF on ORSA items.
- Contributed to and reviewed the various narrative Solvency II submissions made to date by Risk Management.
- Reviewed UPE's Underwriting Policy and associated documents. This review included a review of the alignment to UPE's Risk Appetite Statement.
- Reviewed UPE's Reinsurance Policies and provided comments and recommendations to UPE on possible enhancements. This review included a review of the alignment to UPE's Risk Appetite Statement.
- Attended and actively contributed to:
 - Risk and Compliance Committee, in particular review and consideration of Risk Incidents; and
 - Investment Committee and Asset-Liability Matching activities.
- Assessed the appropriateness of the Standard Formula.
- Advised on the risks associated with product design.

With effect from the start of 2016, the HoAF is required to provide to the Board and CBoI a separate opinion on every ORSA produced.

B.7. OUTSOURCING

UPE's operating model relies heavily on Outsourced Service Providers ("OSP") to provide key service elements. A failure of a critical OSP could result in a material disruption in service delivery for UPE clients.

In order to mitigate the risks associated with outsourcing, ExCo, in conjunction with the Risk Management Function and the Head of Outsourcing has implemented an Outsourcing Management Framework. This framework includes a process for both the selection and the ongoing review and monitoring, of outsourced service providers' performance. A due diligence process, which addresses all material factors that could impact on the potential service provider's ability to perform the business activity, is undertaken prior to the appointment of all outsourcing.

UPE has established an Outsourcing Policy to establish the requirements for identifying, justifying and implementing material outsourcing arrangements. The Outsourcing Policy sets out minimum mandatory outsourcing standards, assigns main outsourcing responsibilities and ensures that appropriate controls and governance structures are established within any outsourcing provision.

The Outsourcing Policy introduces a risk-based approach, adopting a proportionality principle to apply requirements according to the risk profile (distinguishing between critical and non-critical outsourcing) and the materiality of each outsourcing agreement. The outsourcing of critical or important operational functions or activities is managed in compliance with the relevant CBoI guidelines and processes.

UPE has implemented an outsourcing oversight process which is co-ordinated by the Head of Outsourcing. The output of the oversight process for critical outsourcing arrangements is reported to the Risk and Compliance Committee on a quarterly basis and for non-critical outsourcing arrangements on an annual basis.

Information on the critical / important UPE OSPs, along with the services they provide, is provided below.

Exhibit 19	Critical /	Important	Outsourcers	For UPE
	onnoar,	mponom	00100010010	101016

Critical OSP	Core Services	Location
Utmost Services Ireland Limited	Policy and Investment administration services.	Ireland
Utmost Administration Limited	Policy and Investment administration services, IT services.	Isle of Man
Utmost Limited ("UL")	Services to approve UPE's Financial Promotions for its Wealth Solution books of business in the UK Market.	Isle of Man
Utmost Worldwide (sub- outsourcer of USIL)	Policy administration IT services.	Guernsey
SS&C	Policy administration and associated services.	Ireland
Capita ¹	Policy administration and associated services.	Ireland
Marsh Ireland	Administration of insurance schemes.	Ireland
Hienfeld	Policy administration and associated services.	Netherlands
Cuna Mutual	Policy administration and associated services.	Ireland
NordEuropa Life and Health AB	Distribution services.	Sweden
Sedgwick Sweden AB	Claims and servicing administration services.	Sweden

B.8. ANY OTHER INFORMATION

B.8.1. ASSESSMENT OF THE ADEQUACY OF THE SYSTEM OF GOVERNANCE TO THE NATURE, SCALE AND COMPLEXITY OF THE RISKS INHERENT IN THE BUSINESS

The UPE Board, as part of the ORSA process, has assessed its Corporate Governance system and has concluded that it effectively provides for the sound and prudent management of the business, which is proportionate to the nature, scale and complexity of the operations of UPE.

B.8.2. OTHER MATERIAL INFORMATION REGARDING THE SYSTEM OF GOVERNANCE

The following additional processes are implemented under the UPE System of Governance.

Business Continuity

The Company has a Board Approved Business Continuity Policy and maintains comprehensive business continuity plans to ensure that critical business activities can be recovered in the event that a disruptive incident were to occur. This includes Department Specific Business Continuity and IT Disaster Recovery plans which detail the tasks required to recover critical business applications and services in the event that a disruption event. Business Continuity testing is performed on a periodic basis and reporting on such is provided to the Board.

Information Technology and Cyber Security

Cyber Security occupies a key position in the risk profile of the organisation, and a breach of cybersecurity could potentially have a significant adverse impact, including possible reputational damage and significant costs arising in respect of incident response and business interruption. To mitigate these risks, a comprehensive suite

Utmost Holdings Ireland Limited Solvency Financial Condition Report Year-End 2020 32/100

¹ It is noted that in March 2021 Capita Life and Pensions Services (Ireland) Limited was rebranded to SS&C Life and Pensions Services Limited following a takeover.

of controls is in place designed at preserving the confidentiality, integrity and availability of the organisation's information assets.

No other material information is noted.

C. Risk Profile

UHIL and UPE calculate their Solvency Capital Requirement ("SCR") in line with Solvency II Standard Formula.

UHIL, as a holding company, derives the majority of its risk from the life insurance subsidiary, UPE. UHIL had a solvency coverage ratio of 148% at year-end 2020.

UPE continues to be well capitalised relative to the risks that it faces. At year-end 2020 UPE had a solvency capital ratio of 189%.

The primary difference between the UHIL and UPE risk profile is driven by the intercompany loan on the UHIL balance sheet, which is the key driver for the difference in Market Risk. The loan is denominated in GBP.

Further information on the SCR breakdown can be seen in section E.2.2. and UPE's key risks are outlined below.

C.1. UNDERWRITING RISK

C.1.1. LIFE AND HEALTH UNDERWRITING RISK

Life and health underwriting risks, relate to the risk of unfavourable underwriting and expense experience relative to assumptions and expectations resulting in reduced profitability for UHIL.

UHIL's exposure to life and health underwriting risk is solely through the insurance contracts sold by UPE.

As a life insurance company, UPE is at risk from the uncertainty in the assumptions used in the calculation of its liabilities. Assumptions are necessary for expectations of future claims (life or health claims), lapse rates and expenses among other items.

C.1.2. RISK EXPOSURE AND ASSESSMENT

The Risk Map, outlined in Section B.3.1, outlines the Life and Health risks which UPE is exposed to. The key Life and Health Underwriting Risks UHIL is exposed to include:

- Lapse Risk, defined as the change in liabilities due to changes in the exit rates being different than expected. Exits can happen from either a partial or full surrender of a policy. This also includes the risk of a catastrophic event with a mass lapse of policies resulting;
- Expense Risk, defined as a change in the value of liabilities resulting from changes in the expenses incurred in servicing insurance contracts;
- Mortality Risk, defined as a change in the value of liabilities resulting from mortality rates being higher than expected leading to an increase in the value of insurance liabilities. Mortality Risk also includes Mortality Catastrophe Risk, defined as a change in the value of the liabilities, resulting from extreme or irregular mortality events; and

• Health Risk, defined as the change in the value of liabilities resulting in the level of health claims being higher than expected. It also includes Health Catastrophe Risk defined as the change in the value of liabilities, resulting from extreme or irregular events for the health insurance business.

The SCR amounts are calculated as prescribed by EIOPA.

- For Lapse Risk, the measurement is done via the application of a permanent and a catastrophic stress to the underlying lapse rates.
- Expense Risk is measured through the application of stresses to the amount of expenses and expense inflation that the company expects to incur in the future.
- For the Mortality Risks, the uncertainty in insured population mortality and its impact on the Company is measured by applying permanent and catastrophe stresses to the policyholders' death rates.
- For the Health Risks, the uncertainty in insured population sickness or morbidity and its impact on the company is measured by applying permanent or catastrophic stresses to the policyholders' morbidity incidence and recovery rates.

C.1.3. RISK MANAGEMENT AND MITIGATION

UPE Reinsurance Strategy

UPE has in place a reinsurance policy which sets retention limits in relation to the level of insurance business to retain at an individual or group level. Amounts which exceed these limits are reinsured.

UPE's reinsurance arrangements are monitored in relation to the limits and strategy as per the Reinsurance Policy and the Risk Appetite Statement and in conjunction with the company's overall business strategy.

Product Approval Process

The Underwriting Policy outlines the following product preferences for UPE:

- A strong preference towards biometric risks (e.g. death, disability, critical illness),
- A strong preference towards unit-linked products,
- No preference for products including financial guarantees (e.g. pure traditional savings products),
- Limited preference for products including longevity options/ guarantees (e.g. life annuities).

UPE has a detailed product design and approval process in place which sets out the framework for product prioritisation, development, approval and management and this process ensures that there are appropriate governance practices over product development.

C.1.4. RISK SENSITIVITY FOR UNDERWRITING RISKS

UPE carries out stress and scenario testing as part of the ORSA process which includes stress testing for the material underwriting risks. The results of this analysis showed that the most material impact on the SCR cover was in the lapse

and expense stress which is consistent with lapse and expense risks being key drivers of the overall SCR. The impact from the mortality and morbidity stresses was relatively small, consistent with the reinsurance risk mitigation in place.

C.1.5. NON-LIFE UNDERWRITING RISK

This section is not applicable to UHIL.

C.2. MARKET RISK

UHIL's market risk capital requirement is mainly driven by UPE's exposure to market risks through its unit-linked business and in relation to its Shareholder Funds. A certain element of market risk is considered to be within appetite due to the nature of our business.

The primary difference between the UHIL and UPE market risk is driven by the intercompany loan (GBP denominated) on the UHIL balance sheet. This loan is between UHIL and its parent company Utmost International Group Holdings Ltd ("UIGH"). UHIL has mitigated the currency exposure arising from this loan in the UPE currency exposure, so the inclusion of this loan in the UHIL accounts results in a decrease in market risk compared to UPE.

For the protection business there is a general asset position held directly to cover the liabilities. These assets are mainly government, corporate and EU supranational bonds, as well as cash or cash equivalents. A large amount of bonds held by UPE are GBP denominated bonds which give rise to Currency Risk exposure. The loan liability on the UHIL balance sheet as described above offsets this exposure at a UHIL level. UPE is also exposed to interest rate risk and credit spread risk through its sovereign and corporate bond holdings.

In the case of unit-linked business UPE typically invests the premiums collected in financial instruments but does not bear the market risk directly. However, UPE is exposed with respect to its earnings as fees are the main source of profits for UPE from this business line. Adverse developments in the markets directly affects the profitability of UPE as fee income is reduced. The main risks that UPE's unit-linked business is exposed to are equity, currency and credit spread risks.

C.2.1. RISK EXPOSURE AND ASSESSMENT

The key market risks that UPE is exposed to include:

- Equity Risk: a reduction in equity values reduces asset values and hence reduces future fee income.
- Interest Rate Risk: i) where movements in interest rates directly impacts the value of an asset as well as the value of a liability and hence future fee income, and ii) where movements in the interest rate result in an increase in liabilities, including changes in the shape of yield curves.
- Currency Risk: where the movement in exchange rates can reduce the value of an asset and hence reduce future fee income.
- Spread Risk: is defined as the risk of adverse changes in the market value of the assets due to changes in the market value of non-defaulted credit assets. The market value of an asset can decrease because of spreads widening either because the market's assessment of the creditworthiness of the specific obligor

Utmost PanEurope Regular Supervisory Report Year-End 2020

decreases, which is typically accompanied by a credit rating downgrade, or because there is a marketwide systemic reduction in the price of credit assets.

• Property Risk: where movements in property values reduce asset values and future fee income.

C.2.2. RISK MANAGEMENT AND MITIGATION

The following Risk Management and mitigation activities are in place for UPE:

- Asset and liability monitoring and reporting
- The assets held by UPE's Shareholder Fund follow a strict investment mandate with asset type and counterparty limits in place.
- Quarterly monitoring and reporting against the investment limits outlined in the RAS.

C.2.3. RISK SENSITIVITY FOR MARKET RISKS

UHIL carries out stress and scenario testing as part of the ORSA process which includes stress testing for the material market risks. This analysis indicated that UHIL can withstand a severe market risk shock.

C.3. CREDIT RISK

C.3.1. RISK EXPOSURE AND ASSESSMENT

UHIL is mainly exposed to credit risk through UPE.

The credit risks that UPE is exposed to include:

• Default Risk: defined as the risk of incurring losses because of the inability of a counterparty to honour its financial obligations. Prescribed stresses are applied to model default risk in the bond portfolio (referred to as Credit Default Risk) and the default risk arising from the default of counterparties in cash deposits, risk mitigation contracts (including reinsurance), and other type of exposures subject to credit risk (referred to as Counterparty Default Risk).

UPE's main exposures to default risk include:

- The exposure that UPE has to the Italian Revenue relating to the Italian Tax Asset. This is a prepayment of policyholder capital gains tax that UPE makes to the Italian Revenue. UPE can reclaim it either from:
 - Deductions from future payments to the Italian Revenue via the 5 year offset mechanism; or
 - By way of deduction of tax at source from payments to policyholders, where the payment includes capital gains made by policyholders
- The exposure to reinsurance companies defaulting on their obligations.
- UPE's counterparty default exposure from cash deposits.

There is a small amount of counterparty risk to UHIL that arises outside of UPE, mainly on the cash balances held outside UPE.

Utmost PanEurope Regular Supervisory Report Year-End 2020

C.3.2. RISK MANAGEMENT AND MITIGATION

The UPE Board monitors UPE's solvency position with the Italian Tax Asset both included and excluded from UPE's Own Funds and the SCR. The Board has imposed internal hard and soft solvency ratio limits with the Italian Tax Asset excluded from UPE's Own Funds and SCR. An escalation process is required to be followed in the event of a breach of the hard or soft limits.

C.3.3. RISK SENSITIVITY FOR CREDIT RISKS

UPE carries out stress and scenario testing as part of the ORSA process which includes stress testing for the material credit risks. As part of UPE's capital policy, the solvency coverage ratio is monitored net of the Italian Tax Asset (i.e. impact of a full default of the Italian Revenue).

C.4. LIQUIDITY RISK

Liquidity Risk refers to the risk that UHIL and its subsidiaries will not be able to meet both expected and unexpected cash flow requirements.

Liquidity is actively managed by the UPE insurance company. UPE manages Liquidity Risk to meet its own obligations and cash commitments due to unexpected contingent market situations, through an ongoing monitoring of actual and expected cash flows, and the availability of assets that can be sold easily without loss in the event of need. This activity aims at maintaining a high financial robustness both in the short, medium and long term horizons, which helps to mitigate UPE's Liquidity Risk and is the basis for the evaluation of the adequacy of the adopted measures.

UPE has a Liquidity Risk Policy in place which is reviewed and approved at least annually by the Board. The policy outlines the strategies, principles and processes to identify, assess and manage present and forward-looking Liquidity Risks to which UPE is exposed.

It defines in particular:

- The processes and procedures to be followed to ensure an effective Liquidity Risk mitigation and management;
- The System of Governance in place, including roles and responsibilities; and
- The internal and external reporting requirements.

The CFO is responsible for managing the on-going liquidity requirements of UPE.

C.4.1. RISK EXPOSURE AND ASSESSMENT

Liquidity monitoring is completed by the insurance company rather than at the holding company level. When considering Liquidity Risks, key elements are Wealth Solutions Italian Tax Asset ("ITA") payments and Wealth Accumulation new business commission strain. The Wealth Solutions business does not suffer from new business cash strain. However, the majority of UPE's income is sourced from this business line, and is generated by issuing quarterly

Utmost PanEurope Regular Supervisory Report Year-End 2020

fee invoices to the custodians. As a result, prompt fee collection is a key liquidity key performance indicator for UPE.

C.4.2. RISK MANAGEMENT AND MITIGATION

UPE manages Liquidity Risk to meet its own obligations and cash commitments along with unexpected contingent market situations, through the monitoring of actual and expected cash flows, and the availability of assets that can be sold easily without loss in the event of need. This activity is aimed at maintaining a high level of financial robustness both in the short and long term, which helps to mitigate UPE's liquidity risk and is the basis for the evaluation of the adequacy of the adopted measures.

The own fund assets of UPE are predominantly comprised of the ITA asset, investments in the subsidiaries, and a portfolio of AAA, AA, A, BBB rated sovereign, corporate and supranational bonds, investment funds and money market funds.

UPE maintains sufficient liquidity levels with specified limits relating to the minimum amount of shareholder assets invested in short term liquid investments such as deposit accounts or short term bonds.

UPE carries out annual rolling 5-year cash flow projections based on the Strategic Plan targets. These cash flow projections include a number of liquidity stress scenarios.

C.5. OPERATIONAL RISK

C.5.1. RISK EXPOSURE AND ASSESSMENT

Operational Risk is the risk of loss arising from inadequate or failed internal processes, personnel or systems, or from external events. Losses from events such as fraud, litigation, damages to premises, cyber-attacks and failure to comply with regulations are therefore covered in the definition. It also includes financial reporting risk but excludes strategic and reputational risks.

The prescribed Operational Risk SCR calculation is based on premium and insurance contract expense and technical provisions, as a result UHIL's Operational Risk is equal to UPE's.

Operational Risk is monitored at a UHIL level through the Risk Management Function as described in Section B.3.

In line with industry practices, UPE adopts the following Operational Risk classification categories:

- Internal fraud defined as the losses due to acts of a type intended to defraud, misappropriate property or circumvent regulations, the law or company policy, excluding diversity/discrimination events, which involves at least one internal party.
- External fraud defined as the losses due to acts of a type intended to defraud, misappropriate property or circumvent the law, by a third party.

- Employment Practices and Workplace Safety defined as the losses arising from acts inconsistent with employment, health or safety laws or agreements, from payment of personal injury claims, or from diversity/discrimination events.
- Clients, Products and Business Practices defined as the losses arising from an unintentional or negligent failure to meet a professional obligation to specific clients (including fiduciary and suitability requirements), or from the nature or design of a product.
- Damage to Physical Assets defined as the losses arising from loss or damage to physical assets from natural disaster or other events.
- Business disruption and system failures defined as the losses arising from disruption of business or system failures.
- Execution, Delivery and Process Management defined as the losses from failed transaction processing or process management, from relations with trade counterparties and vendors.

Following best industry practices, UHIL's framework for Operational Risk management includes as main activities the risk incident reporting and loss data collection process, risk assessment and scenario analysis.

The risk incident reporting and loss data collection process involves the collection of losses incurred as a result of the occurrence of Operational Risk events and provides a backward-looking view of the historical losses incurred due to Operational Risk events.

The risk assessment and scenario analysis processes provide a forward-looking view on the Operational Risks UPE is exposed to. The Annual Operational Risk and Compliance Assessment provides a high-level evaluation of the forward-looking inherent and residual Operational Risks faced by UHIL. The outcomes of the assessment drive the scenarios assessed as part of the scenario analysis. Scenario analysis is a recurring process which provides a detailed evaluation of the key Operational Risks faced by UPE and their potential impact.

C.5.2. RISK MANAGEMENT AND MITIGATION

All operational activities reside within the insurance company, UPE, and as such UHIL Operational Risks reside primarily within this entity. UPE has identified the following key Operational Risks for the year-ended 31 December 2020:

Risk Category	y Operational Risks Risk Summary	UPE Mitigating Activities
Outsourcing Risk	The risk that entities providing services to UPE do not perform to the required standards. The risk includes a failure by UPE itself to adequately manage, monitor and oversee those outsourcing arrangements.	 UPE has the following controls/processes in place to reduce the inherent risk to within tolerance: Outsourcing Management Framework, coordinated by the Head of Outsourcing, which includes a process for both the selection of and the ongoing review and monitoring of outsourced service providers' performance. Annual review and approval of the Outsourcing Policy and Outsourcing Management Process. Risk assessments (including site/virtual visits where required) over all new Outsourced Service Providers. Quarterly assessments and full annual review over all Outsourced Service Providers. Management of Outsourced Agreement Repository. Quarterly reporting to both ExCo and the Risk and Compliance Committee. Business Continuity Capabilities: Evidence of / Contractual requirement to perform business continuity testing.
Business Continuity and Cyber Risk	The unavailability of staff, IT infrastructures or buildings relates to the risk that a business continuity or disaster recovery event could cause disruption, interruption or loss of products or services and have a material impact on the Company. Cyber Risk is defined as the threat, vulnerabilities and consequences that could arise if logical data is not protected. It can be caused by external attacks to the IT systems in order to steal and manipulate data or make business services unavailable. Information technology is fundamental to the operations of the financial services sector and this dependency increases the risks associated with cyber-attacks.	 UPE has the following controls/processes in place to reduce the inherent risk to within tolerance: Board Approved Information Security Policy in place. Cyber Resilience Programme ongoing to develop an Information Security Management System conforming to ISO27001. Business continuity and disaster recovery planning and testing. Independent third party testing of the external defences along with the internal systems and access controls benchmarked against industry best practice.
Regulatory Risk	Risk of non-compliance with existing or future regulations.	 UPE has the following controls/processes in place to reduce the inherent risk to within tolerance: Regulatory monitoring framework to identify new or changing regulations.

Exhibit 20 UPE Key Operational Risks

Utmost PanEurope Regular Supervisory Report Year-End 2020

Risk Category	Risk Summary	UPE Mitigating Activities
		 Formal processes and procedures in place for existing regulations. Legal and Compliance and Product and Technical Services Teams. Use of external legal providers, as required. Training to the Board and UPE staff relating to key compliance risks.
Conduct Risk	Conduct Risk is defined (by the CBoI) as 'the risk the firm poses to its customers from its direct interaction with them'. Firms need to ensure that they are putting the customer and the integrity of markets at the heart of their business models and strategies. This includes making strategic cultural changes which promote good conduct, establishing oversight around the design and innovation of products and services; and ensuring they are transparent in their dealings with customers. Failure to meet these requirements could result in regulatory scrutiny and fines, reputational loss and potential loss of revenues. Over recent years there has been an increasing onus on firms to define and manage Conduct Risk explicitly as part of their Risk Management Framework and it is considered to be a central part of a firm's Enterprise Risk Management and Strategy.	 UPE has the following controls/processes in place to reduce the inherent risk to within tolerance: Compliance with EIOPA's guidelines on Product Oversight and Governance arrangements by insurance undertakings and insurance distributors. An Intermediary Monitoring Programme to oversee the performance and conduct of UPE's agents and brokers. An Operational Control department to oversee the performance and conduct of UPE's investment partners.
Policy Administration Risk	Risk of errors or delays in administration of policyholder assets including investment and claims management	 UPE has the following controls/processes in place to reduce the inherent risk to within tolerance: Formal processes and procedures in place. Internal Control Framework. Risk assessments and themed reviews. Partner and outsourcing framework. Operational risk incident reporting and escalation process.
External Fraud Risk	Risk of fraud by a third party resulting in a financial loss to UPE. Fraud occurs when an individual deceives another by inducing them to do something or not do	 UPE has the following controls/processes in place to reduce the inherent risk to within tolerance: Anti-Fraud Policy in place. Anti-Fraud training provided to all staff in 2020.

Utmost PanEurope Regular Supervisory Report Year-End 2020

42/100

	something that results in a financial loss. The fraud can be committed either online, in person on via correspondence.	 Code of conduct, whistleblowing and ethics training provided to staff in 2020. Suspicious transaction reporting training provided to relevant staff. Fraud reporting process in place.

C.6. OTHER MATERIAL RISKS

C.6.1. RISK CONCENTRATION

Concentration Risk is a concentration of risk exposures within particular areas (such as intermediaries, counterparties, clients and territories) which might give rise to a potential loss which could threaten the solvency or the liquidity position of the company, thus substantially impacting the company's risk profile. UPE seeks to limit Concentration Risk by assigning concentration limits to counterparties, sectors and industries where appropriate.

UHIL's material risk concentrations are as follows:

- Italian Tax Asset a material proportion of UPE's Own Funds are comprised of the Italian Tax Asset.
- Reinsurance Counterparties UPE reinsurance counterparties are concentrated in a small number of reinsurers.
- Her Majesty's UK Government UPE invests in a significant number of UK government bonds.

UPE mitigates the risk of the Concentration Risk of the Italian Tax Asset by monitoring UPE's solvency position including and excluding the Italian Tax Asset.

The UPE Board has imposed internal hard and soft solvency ratio limits with the Italian Tax Asset excluded from UPE's Own Funds. An escalation process is required to be followed in the event of a breach of the hard or soft limits.

UPE mitigates the concentration risk from reinsurers by implementing and monitoring exposures against Board approved concentration limits. UPE's exposure against these limits is reported to the Risk and Compliance Committee on a quarterly basis.

The UK government bonds held by UPE are highly rated, liquid bonds. The credit risk associated with them under the SCR calculation is zero. These bonds are held to mitigate the GBP liability exposure on the UHIL balance sheet.

C.6.2. REPUTATIONAL RISK

UPE defines Reputational Risk as the possibility of a potential decrease in UPE's value or worsening of its risk profile, due to a reputational deterioration or to a negative perception of UPE's image among its stakeholders. In particular, Reputational Risk is managed mainly as a second level risk originated from a first level risk (as for example an operational or a financial risk).

C.6.3. EMERGING RISKS

Emerging Risks arising from new trends or risks difficult to perceive and quantify, although typically systemic. These usually include changes to the internal or external environment, social trends, regulatory developments, technological achievements, etc. UPE mitigates these risks through investigation and monitoring of management actions. Emerging Risks can be described as follows:

- Perceived as potentially significant, but not fully understood;
- Their impacts not clearly defined in monetary terms;
- Inefficiency of conventional approaches in projecting their relative frequencies and distributions;
- Difficulties establishing nexus between the emerging risk's source and its consequences;
- Typically, outside the company's range of control; and
- Systemic such as climate change and ageing population.

Emerging Risks are considered, assessed and reported by using a 'PESTLE' analysis. PESTLE stands for political, economic, social, technological, legal and environmental, and by using this method, the company assesses potential emerging risks across six key macro and micro economic themes. UPE reviews the Emerging Risk Register on a quarterly basis and reports to the Risk and Compliance Committee.

C.6.4. STRATEGIC RISK

Strategic Risk is defined as the possible source of loss that might arise from the pursuit of an unsuccessful business plan.

For example, Strategic Risk might arise from making poor business decisions, from the substandard execution of decisions, from inadequate resource allocation, or from a failure to respond well to changes in the business environment.

UPE ExCo and Board are involved in the strategic planning process of UPE, starting from the target setting phase through to the monitoring of processes. UPE has a number of specific strategic risk preferences and these are actively monitored through the RAS.

The UHIL Board is involved in the strategic planning process of UHIL, starting from the target setting phase through to the monitoring of processes.

C.6.5. CONTAGION RISK

UHIL defines Contagion Risk to be the probability that significant economic changes in one country will spread to other countries. Contagion can refer to the spread of either economic booms or economic crises throughout a geographic region. This risk is mitigated through the diversification of UHIL's business operations and products.

C.7. ANY OTHER INFORMATION

On 30 April 2020 Fitch Ratings affirmed the IFS rating of UPE at 'A' (Strong) with a Stable Outlook. The rating affirmation is based on Fitch's current assessment of the impact of the coronavirus pandemic.

C.7.1. EXPECTED PROFIT INCLUDED IN FUTURE PREMIUMS

The total expected profits included in future premiums is €17,276k at 31st December 2020, compared with €11,722k at 31st December 2019. The increase is mainly due to growth in the affected business since last year-end and the positive effect of reduction in lapse rates.

D. Valuation for Solvency Purposes

D.1. ASSETS

D.1.1. VALUATION OF ASSETS FOR SOLVENCY II BALANCE SHEET

The following paragraphs describe the value of assets for solvency and financial statements purposes, along with the valuation criteria and the common methodology used for the determination of fair value of assets and liabilities. The following sections are covered in the report below:

- Valuation of assets explanation of differences between the financial statements and Solvency II balance sheet.
- Fair value hierarchy explanation of methods used to classify assets into three levels, based on the inputs used in valuation techniques to increase consistency and comparability of fair value measurements.
- Guidance on fair value measurement approach UHIL reviews its financial investments and classifies them in accordance with IFRS 13 'Fair Value Measurement'. The same approach is taken for investments held on behalf of life assurance policyholders who bear the Investment Risk.
- Valuation techniques the methods used to maximise the use of observable inputs.

Exhibit 21a UHIL Solvency II Assets Valuation

	31 December 2019	31 December 2020
	€'000	€'000
Solvency II Valuation	18,592,497	18,872,384
Statutory Accounts Valuation	18,764,182	19,064,392
Difference	(171,684)	(192,008)

UHIL's assets increased due to organic growth of the business during the year.

Exhibit 21b UPE Solvency II Assets Valuation

	31 December 2019	31 December 2020
	€'000	€'000
Solvency II Valuation	18,299,563	18,451,584
Statutory Accounts Valuation	18,391,282	18,562,278
Difference	(91,720)	(110,694)

UPE's assets increased in 2020 mainly due to the combined impact of new business cashflow and investment value movements.

Valuation of Assets

The UPE and UHIL financial statements have been prepared in accordance with IFRS as adopted by the EU and applicable to companies reporting under IFRS at 31 December 2020.

Certain assets are excluded or measured at fair value to comply with Solvency II principles. In particular, the exceptions and non-applicable items for UHIL are summarised in below.

Exhibit 22a UHIL Asset Exceptions under Solvency II

Valuation of Assets	Solvency II	Statutory Accounts	Difference
31 December 2020	€'000	€'000	€'000
Deferred tax assets	-	6,452	(6,452)
Deferred acquisition costs	-	27,742	(27,742)
Fixed assets	10,011	10,011	-
Intangible assets	-	155,340	(155,340)
Investments (other than assets held for index-linked and unit-linked funds)	239,676	238,358	1,318
Assets held for index-linked and unit-linked funds	17,764,557	17,764,557	-
Ceded reinsurance reserves	588,892	588,094	798
Receivables	59,606	64,196	(4,590)
Cash and cash equivalents	81,548	81,548	-
Withholding tax asset	128,094	128,094	-
Total Assets	18,872,384	19,064,392	(192,008)

Certain assets are excluded or measured at fair value to comply with Solvency II principles. In particular, the exceptions and non-applicable items for UPE are summarised in below.

Exhibit 22b UPE Asset Exceptions under Solvency II

Valuation of Assets	Solvency II	Statutory Accounts	Difference
31 December 2020	€'000	€'000	€'000
Deferred tax assets	-	6,010	(6,010)
Deferred acquisition costs	-	66,717	(66,717)
Fixed assets	31	31	-
Intangible assets	-	34,868	(34,868)
Investments (other than assets held for index-linked and unit-linked funds)	245,260	244,568	693
Assets held for index-linked and unit-linked funds	17,366,202	17,366,202	-
Ceded reinsurance reserves	588,892	588,094	798
Receivables	56,359	60,949	(4,590)
Cash and cash equivalents	66,746	66,746	-
Withholding tax asset	128,094	128,094	-
Total Assets	18,451,584	18,562,278	(110,694)

The primary objective for valuation as set out in Article 75 of L1 - Dir (EIOPA guidelines) requires an economic, marketconsistent approach to the valuation of assets and liabilities. According to the approach for Solvency II, when valuing balance sheet items on an economic basis, undertakings need to consider the risks that arise from a particular balance sheet item, using assumptions that market participants would use in valuing the asset or the liability.

Assets should be valued at the amount for which they could be exchanged between knowledgeable willing parties in an arm's length transaction.

Liabilities should be valued at the amount for which they could be transferred, or settled, between knowledgeable and willing parties in an arm's length transaction.

This valuation section describes the value of assets for Solvency II purposes and for financial statements, valuation criteria and the methodology used by UHIL for the determination of fair value of assets and liabilities.

The following analysis is included for UHIL:

Deferred Tax Asset

Deferred taxation is provided in the financial statements on timing differences that have originated but not reversed at the statement of financial position date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the statement of financial position date. Timing differences are temporary differences between profits as computed for taxation purposes and profits as stated in the financial statements which arise because certain items of income and expenditure in the financial statements are dealt with in different years for taxation purposes.

Deferred tax is measured at the tax rates that are expected to apply in the years in which the timing differences are expected to reverse based on tax rates and laws that have been enacted by the statement of financial position date. Deferred tax is not discounted.

In the Solvency II balance sheet, deferred tax assets and liabilities arise because there are differences between the value ascribed to an asset or a liability for tax purposes, and its value in accordance to the Solvency II principles.

A deferred tax asset ("DTA") should be recognised in the following cases:

- The Solvency II balance sheet value of an asset is lower than the related carrying value for tax purposes; or
- The Solvency II balance sheet value of a liability is higher than the related carrying value for tax purposes.

The DTA is netted against the Deferred Tax liability, as outlined in exhibit 26.

Deferred Acquisition Costs ("DAC")

Commission costs incurred in the acquisition of new business are deferred as an explicit DAC asset. This asset is amortised against future revenue margins on the related policies. The DAC asset is reviewed for recoverability at the end of each accounting period against future revenue margins expected to arise from the related policies. They are the part of acquisition costs allocated to future reporting periods. DAC is recognised under IFRS but is disallowed for Solvency II asset valuation purposes. As a result, the DAC asset for Solvency II decreased by €27,742k.

Fixed Assets

Fixed assets are stated at cost less accumulated depreciation. Depreciation is calculated to write off the original cost of these assets over their estimated useful lives in equal instalments. There is no valuation difference under Solvency II and the financial statements.

Intangible Assets

Intangible assets of €155,340k represents the AVIF on the acquisition of UPE and the Athora book of business. Key assumptions include future lapse, renewal and expense assumptions. The AVIF is amortised in line with the projected run-off of the Solvency II best estimate liabilities. The AVIF is reviewed for impairments at each reporting date by reference to the value of future profits in accordance with Solvency II principles. Intangible assets are valued at nil under Solvency II, which resulted in an assets decrease of €155,340k.

Investments including assets held for index-linked and unit-linked funds

In the statutory financial statements UHIL has classified its financial assets into the following categories:

• Assets held at fair value through profit or loss

Financial assets held to back investment contracts and one of UPE's solvency portfolios have been designated upon initial recognition as at fair value through profit or loss and are carried at fair value. The basis of this designation is that financial assets and liabilities in connection with investment contracts are managed and evaluated together on a fair value basis. This designation eliminates or significantly reduces a measurement inconsistency that would otherwise occur if these financial assets were not measured at fair value and the changes in fair value were not recognised in the statement of comprehensive income account. There is no valuation difference under Solvency II and the financial statements.

• Amortised cost investments

UPE holds a solvency portfolio which consists of relatively long dated bonds (or fixed income securities) which are held for asset-liability matching purposes. UPE has classified these as amortised cost investments and has the positive intention and ability to hold them to maturity. After initial measurement, these investments are measured at amortised cost using the effective interest rate method, less impairment. The amortisation, and any impairment, is included as investment income. In the Solvency II balance sheet these assets are revalued on a fair value basis. As a result, on a fair value basis the valuation for Solvency II increased by €1,318k.

• Derivative financial instruments

Derivatives are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at their fair value. Changes in the fair value are recognised immediately in the statement of comprehensive income account. Fair values are obtained from the quoted market prices in active markets. All derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative. All derivatives are held within policyholder investments, there are no policyholder investments in derivatives.

Listed investments are valued at current bid-price on the statement of financial position date. Unlisted investments for which a market exists are also stated at the current mid-price on the statement of financial position date or the last trading day before that date.

The value of other unlisted investments, for which no active market exists, are established at directors' best estimate of fair value, based on third party information or valuations provided by counterparties, or valued at cost and reviewed for impairment at the statement of financial position date. There is no valuation difference under Solvency II and the statutory financial statements.

Ceded reinsurance reserves

This amount represents the reinsurers' share of technical reserves. The ceded reinsurance reserves for Solvency II decreased by €798k. Please refer to section D.1 for detailed narrative on the valuation of technical liabilities.

Receivables

Receivables represent amounts owing within UPE. Receivables are held at initial book value in UPE's financial statements and are recoverable within one year. There is a valuation difference of €4,590k between Solvency II and the statutory financial statements.

Cash and cash equivalents

Cash is a liquid asset and comprises cash holdings in current accounts. Balances are held at initial book value in UHIL's financial statements. There is no valuation difference under Solvency II and the statutory financial statements.

Italian Tax Asset

UPE, as an Italian Tax Agent is required to make an annual tax prepayment to the Italian Tax Authorities of 0.45% of the Italian assets under administration at 31 December. Contributions to the Italian Revenue are recognised as a tax prepayment asset. There is no valuation difference under Solvency II and the statutory financial statements.

Fair Value Hierarchy

IFRS 13 seeks to increase consistency and comparability in fair value measurements and related disclosures through a 'fair value hierarchy'. The hierarchy categories the inputs used in valuation techniques into three levels. The hierarchy gives the highest priority to (unadjusted) quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs:

Level 1 inputs

Level 1 inputs are quoted prices in active markets for identical assets or liabilities that the entity can access at the measurement date. A quoted market price in an active market provides the most reliable evidence of fair value and is used without adjustment to measure fair value whenever available, with limited exceptions. If an entity holds a position in a single asset or liability and the asset or liability is traded in an active market, the fair value of the asset or liability is measured within Level 1 as the product of the quoted price for the individual asset or liability and the quantity held by the entity, even if the market's normal daily trading volume is not sufficient to absorb the quantity held and placing orders to sell the position in a single transaction might affect the quoted price.

Level 2 inputs

Level 2 inputs are inputs other than quoted market prices included within Level 1 that are observable for the asset or the liability, either directly or indirectly.

Level 3 inputs

Level 3 inputs are unobservable inputs for the asset. Unobservable inputs are used to measure fair value to the extent that relevant observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. An entity develops unobservable inputs using the best information available in the circumstances, which might include the entity's own data, taking into account all information about market participant assumptions that is reasonably available.

Guidance on Fair Value Measurement Approach

The objective of a fair value measurement is to estimate the price at which an orderly transaction to sell the asset or to transfer the liability would take place between market participants at the measurement date under current market conditions.

A fair value measurement requires an entity to determine all of the following:

- The particular asset or liability that is the subject of the measurement (consistently with its unit of account);
- For a non-financial asset, the valuation premise that is appropriate for the measurement (consistently with its highest and best use);
- The principal (or most advantageous) market for the asset or for the liability; and
- The valuation technique(s) appropriate for the measurement, considering the availability of data with which to develop inputs that represent the assumptions that market participants would use when pricing the asset or the liability and the level of the fair value hierarchy within which the inputs are categorised.

IFRS 13 provides further guidance on the measurement of fair value, including the following:

- An entity takes into account the characteristics of the asset or the liability being measured that a market participant would take into account when pricing the asset or the liability at measurement date (e.g. the condition and location of the asset and any restrictions on the sale and use of the asset);
- Fair value measurement assumes an orderly transaction between market participants at the measurement date under current market conditions;
- Fair value measurement assumes a transaction taking place in the principal market for the asset or the liability, or in the absence of a principal market, the most advantageous market for the asset or the liability;
- A fair value measurement of a non-financial asset takes into account its highest and best use;

- A fair value measurement of a financial or non-financial liability or an entity's own equity instruments assumes it is transferred to a market participant at the measurement date, without settlement, extinguishment, or cancellation at the measurement date;
- The fair value of a liability reflects non-performance risk (the risk the entity will not fulfil an obligation), including an entity's own credit risk and assuming the same non-performance risk before and after the transfer of the liability; and
- An optional exception applies for certain financial assets with offsetting positions in market risks or counterparty credit risk, provided conditions are met (additional disclosure is required).

Valuation Techniques

An entity uses valuation techniques appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

The objective of using a valuation technique is to estimate the price at which an orderly transaction to sell the asset would take place between market participants and the measurement date under current market conditions. Three used valuation techniques are:

- Market approach uses prices and other relevant information generated by market transactions involving identical or comparable (similar) assets/liabilities or a group of assets/liabilities (e.g. a business).
- Cost approach reflects the amount that would be required currently to replace the service capacity of an asset (current replacement cost).
- Income approach converts future amounts (cash flows or income and expenses) to a single current (discounted) amount, reflecting current market expectations about those future amounts.

In some cases, a single valuation technique will be appropriate, whereas in other cases multiple valuation techniques will be appropriate.

Further information on UPE's assets is included in S.02.01.02 in Section F.

D.2. TECHNICAL PROVISIONS

The Life Technical Provisions as at 31 December 2020 have been assessed adopting methodology and techniques which are compliant with the Solvency II framework and are proportionate to the nature, scale and complexity of the business in question.

Life Technical Provisions results as at 31 December 2020 are set out in the table below. The table below shows that UPE accounts for 99% of UHIL technical provisions.

Exhibit 23a UHIL Main Technical Provisions Results

Entity	31 December 2019 €'000	31 December 2020 €'000
Best Estimate of Liabilities	17,929,415	18,181,309
Risk Margin	86,275	98,200
Gross Technical Provisions	18,015,690	18,279,509
Reinsurance Recoverable	(583,106)	(588,892)
Net Technical Provisions	17,432,583	17,690,617

UHIL's technical provisions increased in line with projected growth over 2020.

Exhibit 23b UPE Main Technical Provisions Results

Entity	31 December 2019 €'000	31 December 2020 €'000
Best Estimate of Liabilities	17,664,546	17,778,599
Risk Margin	86,275	98,200
Gross Technical Provisions	17,750,820	17,876,800
Reinsurance Recoverable	(583,106)	(588,892)
Net Technical Provisions	17,167,714	17,287,907

UPE's net technical provisions increased mainly due to changes in policyholder funds since year-end 2019, driven mainly by increases due to year on year market performance and new business, offset by policyholder withdrawals due to lapses or surrenders.

The difference between IFRS reserves and SII technical provisions is due to the methodological differences between the two valuations. The valuation of the IFRS reserves is based on technical provisions calculated in accordance with local accounting principles. The Solvency II valuation, instead, is based on the projection of future cash flows performed using best estimate assumptions, and discounting using the current interest rate term structure. Moreover, under the Solvency II framework, the valuation of technical provisions includes the risk margin which is not included in the valuation of IFRS reserves

The main factors that have an impact on the technical provisions are set out below:

- The Best Estimate assumptions;
- The application of contract boundaries; and
- Projected SCRs: The risk margin is a constituent part of the total technical provisions. As the risk margin is based on projected SCRs the method and assumptions used in projecting these SCRs can have a sizeable impact on the resulting risk margin.

In calculating the technical provisions, UPE has made material judgments in relation to:

- The choice of what are deemed to be best estimate assumptions;
- The use of certainty equivalent deterministic calculations;
- The choice of method used in calculating the risk margin; and
- The application of contract boundaries.

Best Estimate of Liabilities

The BEL is defined as the probability-weighted average of future cash-flows, taking account of the time value of money (expected present value of future cash-flows), using the relevant risk-free interest rate term structure.

The projected future cash flows typically include:

- Regular premium receipts (subject to contract boundaries);
- Claims payments with an allowance for any early discontinuance charges;
- Expenses;
- Commissions;
- External fund charges;
- Costs associated with the Italian Tax Asset; and
- Profit share payments.

These cash flows are then discounted using the relevant risk-free rates provided by EIOPA to obtain the gross BEL.

Reinsurance Recoverable

Reinsurance recoverable is defined as the present value of the future cash flows arising from the reinsurance contractual agreements.

Risk Margin

In addition to the best estimate liabilities, Solvency II technical provisions include a risk margin to cover the cost of capital held each year in respect of non-hedgeable risks.

Description of the Level of Uncertainty of Life Technical Provisions Valuation

The key sources of uncertainty for the company are expenses, lapses and potential costs arising out of litigation. It is noted that no significant simplified methods were used to calculate technical provisions, including those used for calculating the risk margin.

UHIL and UPE does not apply a volatility adjustment, as referred to in Article 77d of Directive 2009/138/EC.

No Basic Own Fund items have been subject to transitional arrangements.

Utmost Holdings Ireland Limited Solvency and Financial Condition Report Year-End 2020 55/100

Further information on the technical provisions is included in S.02.01.02 in Section F.

D.3. OTHER LIABILITIES

D.3.1. VALUATION OF LIABILITIES FOR SOLVENCY II BALANCE SHEET

The following paragraphs describe the valuation criteria and the common methodology used by UPE for the determination of fair value of other liabilities.

Valuation of Liabilities

In the Solvency II environment, fair value should be generally determined in accordance with IFRS. Certain liabilities are excluded or fair valued to comply with Solvency II principles. In particular, the exceptions and non-applicable items for UHIL are as follows.

- Technical liabilities;
- Deferred taxes;
- Financial liabilities;
- Deferred income liability;
- Other liabilities; and
- Contingent liabilities (not applicable for UPE).

Exhibit 24a UHIL Solvency II Liabilities Valuation

	31 December 2019	31 December 2020
	€'000	€'000
Solvency II Valuation	18,300,569	18,582,092
Statutory Accounts Valuation	18,514,012	18,835,416
Difference	(213,443)	(253,324)

UHIL's liabilities UHIL's liabilities increased in line with projected growth over 2020.

Exhibit 24b UPE Solvency II Liabilities Valuation

	31 December 2019	31 December 2020
	€'000	€'000
Solvency II Valuation	17,893,981	18,048,921
Statutory Accounts Valuation	18,175,770	18,352,086
Difference	(281,789)	(303,164)

UPE's liabilities increased in 2020 mainly due to the growth in policyholder Technical Provisions, matching the growth

Utmost Holdings Ireland Limited Solvency and Financial Condition Report Year-End 2020 56/100

in investment values.

Exhibit 25a UHIL Value of Liabilities

Values of Liabilities 31 December 2020	Solvency II Value	Statutory Accounts Value	Difference
ST December 2020	€'000	€'000	€'000
Technical liabilities - life (including index- linked and unit-linked)	18,279,509	18,495,067	(215,558)
Deferred tax liabilities	23,057	15,059	7,998
Financial liability - group loan	111,663	111,663	-
Deferred income liability	-	45,763	(45,763)
Other liabilities	145,531	145,531	-
Subordinated liability	22,333	22,333	-
Total Liabilities	18,582,092	18,835,416	(253,324)

Exhibit 25b UPE Value of Liabilities

Values of Liabilities 31 December 2020	Solvency II Value	Statutory Accounts Value	Difference
ST December 2020	€'000	€'000	€'000
Technical liabilities - life (including index- linked and unit-linked)	17,876,799	18,092,355	(215,556)
Deferred tax liabilities	27,176	-	27,176
Deferred income liability	-	114,784	(114,784)
Other liabilities	122,613	122,613	-
Subordinated liability	22,333	22,333	-
Total Liabilities	18,048,921	18,352,086	(303,164)

The valuation section describes the value of liabilities for solvency purposes and for financial statements, valuation criteria and the common methodology used by UHIL for the determination of fair value of assets and liabilities.

The following analysis is included for UHIL:

Technical Liabilities

The technical liabilities comprise the technical provisions for life assurance policies where the investment risk is borne by the policyholders, the provision for claims, the life assurance provision and the provision for unearned premiums.

Under Solvency II, technical provisions comprise the BEL and risk margin. The BEL recognises the cash flow required to meet policyholder liabilities, while the risk margin represents a prudent margin for unavoidable uncertainty.

Please refer to section D2 for detailed narrative on the valuation of technical provisions.

Deferred Tax Liability

In the Solvency II balance sheet, deferred tax assets and liabilities arise because there are differences between the value ascribed to an asset or a liability for tax purposes, and its value in accordance to the Solvency II principles.

Therefore, a deferred tax liability ("DTL") should be recognised in the following cases:

- The Solvency II Balance Sheet value of an asset is higher than the related carrying value for tax purposes; or
- The Solvency II Balance Sheet value of a liability is lower than the related carrying value for tax purposes.

A DTL is the recognition of a tax debt to be paid at a later date because of a future profit which is already anticipated in the economic balance sheet. This profit (i.e. the difference between the market value and the book value) leads to an increase of the net asset value. A DTL will be recognised for unrealised taxable gains such as an increase of a financial asset value, or a decrease of the value of Technical Provisions when shifting from book value to market value. The adjustments that gave rise to a net DTL are set below. The net DTL for Solvency II increased by €14,450k at year-end 2020.

Solvency II Balance Sheet Adjustments 31 December 2020	Adjustment to Balance Sheet	Deferred Tax Liability Impact
	€'000	€'000
Investments – FV of HTM Bonds	1,318	(165)
Technical Provisions	215,556	(31,924)
Elimination of Deferred Income Liability	45,763	(5,720)
Reinsurers share of technical provisions	798	(100)
Elimination of deferred acquisition costs	(27,742)	3,468
Elimination of intangible assets	(155,340)	19,417
Receivables	(4,590)	574
Total	75,763	(14,450)

Financial Liabilities

In 2018 UPE issued a GBP 20,000k loan to another group company, UL. The balance outstanding at 31 December 2020 amounted to €22,333k. There is no valuation difference between the Solvency II and the statutory financial statements. Note that the GBP 20,000k Loan Note issued by UPE to UL was established as a Tier 2 Capital instrument. There is a UPE liability for this on the Solvency II Balance sheet of €22,333k declared as a Subordinated Liability in Basic Own Funds.

Deferred Income Liability

A portion of the unit-linked front-end fees received at the inception of a contract and anticipated future margins such as actuarial funding is deferred and presented as a deferred income liability ("DIL"), gross of tax, in the financial statements. The liability is amortised over the expected term of the contract. DIL is recognised under IFRS but is disallowed under Solvency II.

Other Liabilities

Other liabilities represent amounts owing by UPE. Other liabilities are held at initial book value in UHIL's financial statements. There is no valuation difference between the Solvency II and the statutory financial statements

Contingent Liabilities

UPE does not have any contingent liabilities.

Fair Value Measurement Approach

The fair value measurement approach for other liabilities is outlined above.

Further information on UPE's liabilities is included in S.02.01.02 in Section F.

D.4. ALTERNATIVE METHODS FOR VALUATION

UHIL and UPE does not use any alternative methods for valuation.

D.5. ANY OTHER INFORMATION

No other information noted.

E. Capital Management

E.1. OWN FUNDS

According to the Article 87 of the Directive 2009/138/EC (hereinafter 'Directive' or 'L1 – Dir"), Own Funds comprise the sum of Basic Own Funds, referred to in Article 88 and Ancillary Own Funds referred to in Article 89.

E.1.1. CAPITAL MANAGEMENT POLICIES

UPE has a Capital Management policy in place which is approved on an annual basis by the Board and includes the following:

- A description of the procedure to ensure that own fund items, both at the time of issue and subsequently, meet the requirements of the applicable capital and distribution regime and are classified correctly as the applicable regime requires;
- A description of the procedure to monitor the issuance of Own Fund items according to the medium-term capital management plan;
- A description of the procedure to ensure that the terms and conditions of any own fund item are clear and unambiguous in relation to the criteria of the applicable capital regime; and
- A description of the procedures to:
 - ensure that any policy or statement in respect of ordinary share dividends is taken into account in consideration of the capital position; and
 - identify and document instances in which distributions on an own funds item are expected to be deferred or cancelled.

In addition to the Capital Management policy, UPE prepares a Capital Management Plan which is approved by the Board on an annual basis. The purpose of the Capital Management Plan is to outline the capital requirements of UPE.

Planning and managing own funds are a core part of the strategic planning process.

Basic Own Funds

According to Article 88 of L1-Dir, Basic Own Funds is defined as the sum of the excess of assets over liabilities (reduced by the amount of own shares held by the insurance or reinsurance undertaking) and subordinated liabilities.

The components of the excess of assets over liabilities are valued in accordance with Article 75 and Section 2 of the Directive, which states that all assets and liabilities must be measured on market consistent principles.

Basic Own Fund items shall be classified into three tiers, depending on the extent to which they possess specific characteristics. Article 69 of Delegated Acts issued at October 2014 (hereinafter 'L2 – DA' or 'DA"), outlines Tier 1 capital, with Article 72 and Article 76 covering Tier 2 and Tier 3 capital respectively.

UHIL's Basic Own Funds includes ordinary share capital and reconciliation reserve. UHIL holds mainly Tier 1 Capital, with a small element of Tier 2 Capital.

Exhibit 27a UHIL Total Eligible Own Funds to meet the SCR

	31 December 2019	31 December 2020
	€'000	€'000
Tier 1 Unrestricted	291,929	290,292
Tier 1 Restricted	-	-
Tier 2	23,623	22,333
Tier 3	-	-
Total	315,551	312,624

Tier 1 Basic Own Funds

Basic Own Fund items are classified into three tiers, depending on the extent to which they possess specific characteristics. Details on the composition of UHIL's Own Funds assets are outlined above.

UPE's Basic Own Funds includes ordinary share capital, capital contributions and reconciliation reserve. UPE holds mainly Tier 1 Capital, with a small element of Tier 2 Capital.

Exhibit 27b UPE Total Eligible Own Funds to meet the SCR

	31 December 2019	31 December 2020
	€'000	€'000
Tier 1 Unrestricted	390,581	402,662
Tier 1 Restricted	-	-
Tier 2	23,623	22,333
Tier 3	-	-
Total	414,204	424,995

Basic Own Fund items are classified into three tiers, depending on the extent to which they possess specific characteristics. Generally, assets which are free from any foreseeable liabilities are available to absorb losses due to adverse business fluctuations on a going-concern basis or in the case of winding-up. UPE's excess of assets over liabilities, is valued in accordance with the principles set out in L1 - Dir, and treated as Tier 1. Details on the composition of UPE's Own Funds assets are outlined above.

UHIL Ordinary Share Capital:

Exhibit 28 UHIL Ordinary Share Capital 31 December 2020

	2020 €'000
Authorised:	
300,000,000 (2019: 300,0000,000) Ordinary Shares of €1.00 each	300,000
Total	300,000
Allotted, Called Up and Fully Paid:	
187,850 (2019: 174,850,001) Ordinary Shares of €1.00 each	188
Total	188

Capital Contribution:

Capital contributions arise when funds are provided to a company by way of a non-refundable and unconditional gift. Non-refundable capital contributions for UPE amounted to €81,423k, none noted for UHIL.

Reconciliation Reserve:

The excess of assets over liabilities are divided into amounts that correspond to capital items in the financial statements and a reconciliation reserve. The reconciliation reserve may be positive or negative. For UPE, the reconciliation reserve is made up of the revenue reserves as per the financial statements and adjustments to assets and liabilities for Solvency II purposes, as outlined in sections D1 and D3.

Tier 2 Basic Own Funds

During 2018, UPE issued a loan note for GBP 20,000k to UL. This loan was established as a Tier 2 capital instrument and is included on the Solvency II balance sheet at €22,333k. In addition, this is declared as a Subordinated Liability in Basic Own Funds in Section D.3.1.

Tier 3 Basic Own Funds

This does not apply to UPE or UHIL.

Reconciliation between Equity in the Financial Statements and Basic Own Funds - UHIL

Basic Own Funds is valued at €312,624k, while the shareholders' equity per the statutory accounts is €228,977. The table below reconciles the movement from shareholders' equity to Basic Own Funds.

Exhibit 29a UHIL Reconciliation to Shareholders' Equity

Reconciliation of Shareholders Equity to Basic Own Funds	31 December 2020 €'000
Shareholder Equity - Called up share capital	188
Shareholder Equity - Retained Earnings	228,789
Total Shareholder Equity	228,977
Elimination for Deferred Acquisition Costs and Deferred Income Liability	18,022
Elimination of Intangible Assets	(155,340)
SII Valuation of Technical Provisions	216,355
SII Valuation of Investments	1,317
SII Valuation of Receivables	(4,590)
Deferred Taxes	(14,450)
Excess of Assets over Liabilities	290,291
Subordinated liabilities	22,333
Total Eligible Own Funds	312,624

Reconciliation between Equity in the Financial Statements and Basic Own Funds - UPE

Basic Own Funds is valued at €424,995k, while the shareholders' equity per the statutory accounts is €210,191k. The table below reconciles the movement from shareholders' equity to Basic Own Funds.

Reconciliation of Shareholders Equity to Basic Own Funds	31 December 2020 €'000
Shareholder Equity - Called up share capital	18,757
Shareholder Equity - Non-refundable capital contribution	81,423
Shareholder Equity - Retained Earnings	110,011
Total Shareholder Equity	210,191
Elimination for Deferred Acquisition Costs and Deferred Income Liability	48,068
Elimination of Intangible Assets	(34,868)
SII Valuation of Technical Provisions	216,355
SII Valuation of Financial Liabilities	-
SII Valuation of Investments	692
SII Valuation of Receivables	(4,590)
Deferred Taxes	(33,186)
Foreseeable Dividends	-
Excess of Assets over Liabilities – Net of Dividend	402,662
Subordinated liabilities	22,333
Total Eligible Own Funds	424,995

Exhibit 29b UPE Reconciliation to Shareholders' Equity

Own Funds increased in 2020 primarily due to the exclusion of a foreseeable dividend payment in 2020 (2019: €15,000k).

Utmost Holdings Ireland Limited Solvency Financial Condition Report Year-End 2020 63/100

Deduction from Own Funds

The deduction rule from Own Funds does not apply to UHIL.

Ancillary Own Funds

Ancillary Own Funds do not apply to UHIL.

E.1.2. ELIGIBLE OWN FUNDS

Exhibit 30a UHIL Own Funds Assets

31 December 2020	Total €'000	Tier 1 Unrestricted €'000	Tier 1 Restricted €'000	Tier 2 €'000	Tier 3 €'000
Total Eligible Own Funds to Meet the MCR	310,581	290,292	-	20,289	-
Total Eligible Own Funds to Meet the SCR	312,624	290,292	-	22,333	-

UHIL maintains an efficient capital structure to meet its regulatory requirements. UHIL is required to hold sufficient capital to cover the SCR. The SCR at 31 December 2020 was €210,641k. UHIL's Own Funds at that date were €312,624k. This represents a solvency ratio of 148%.

Most of UHIL's Own Funds are classified as Tier 1, with €22,333k classified as Tier 2. All of the Own Funds are eligible to cover the SCR, but there is a restriction on Tier 2 eligible own funds to cover the MCR.

Exhibit 30b UPE Own Funds Assets

31 December 2020	Total €'000	Tier 1 Unrestricted €'000	Tier 1 Restricted €'000	Tier 2 €'000	Tier 3 €'000
Total Eligible Own Funds to Meet the MCR	422,870	402,662	-	20,208	-
Total Eligible Own Funds to Meet the SCR	424,995	402,662	_	22,333	-

UPE maintains an efficient capital structure to meet its regulatory requirements. UPE is required to hold sufficient capital to cover the SCR. The SCR at 31 December 2020 was €224,530k. UPE's Own Funds at that date were €424,995k. This represents a solvency ratio of 189%.

Most of UPE's Own Funds are classified as Tier 1, with €402,662k classified as Tier 2. All of the Own Funds are eligible to cover the SCR, but there is a restriction on eligible Own Funds to cover the MCR.

E.1.3. ELIGIBLE OF OWN FUNDS TO MEET THE SOLVENCY CAPITAL REQUIREMENT

All of UHIL's Own Funds are classified as Tier 1 or Tier 2 and are eligible to meet the SCR.

E.1.4. ELIGIBLE OF OWN FUNDS TO MEET THE MINIMUM CAPITAL REQUIREMENT

All of UHIL's Own Funds Tier 1 capital is eligible to meet the MCR, but the Tier 2 Capital is restricted as a result of EIOPA guidelines. Further information on the Own Funds is included in S.23.01.01 in Section F.

E.2. SOLVENCY CAPITAL REQUIREMENT AND MINIMUM CAPITAL REQUIREMENT

E.2.1. SCR AND MCR VALUES

Both UHIL and UPE use the Standard Formula as prescribed by the Directive 2009/138/EC and the Delegated Regulation (EU) 2015/35 to calculate the SCR.

Neither UPE nor UHIL use any simplified calculations for any risk submodule in the SCR. No undertaking specific parameters or capital add-ons are used in the calculation.

The UHIL MCR is calculated as the sum of:

- UPE MCR which is calculated using a formulaic approach and is equal to 45% of the UPE SCR.
- The local minimum capital requirement for UBL as prescribed by the Bermuda Monitory Authority.

Exhibit 31a UHIL SCR and MCR Values

	31 December 2019	31 December 2020
	€'000	€'000
Solvency Capital Requirement	203,189	210,641
Minimum Capital Requirement	91,435	101,447
Own Funds to Cover SCR	315,551	312,624
Solvency Coverage Ratio	155.30%	148.42%
Own Funds to Cover MCR	310,216	310,581
Minimum Capital Ratio	339.27%	306.15%

Exhibit 31b UPE SCR and MCR Values

	31 December 2019	31 December 2020
	€'000	€'000
Solvency Capital Requirement	217,733	224,530
Minimum Capital Requirement	97,980	101,038
Own Funds to Cover SCR	414,204	424,995
Solvency Coverage Ratio	190.23%	189.28%
Own Funds to Cover MCR	409,930	422,870
Minimum Capital Ratio	418.38%	418.52%

The changes in UPE and UHIL SCR, MCR and own funds are mainly driven by offsetting impacts from emergence of cash from inforce business, market performance; changes to dividend provision, basis changes, new business, and policyholder withdrawals in form of lapses and partial withdrawals over the year. As can be seen from the above tables, the overall Solvency Coverage Ratio did not change significantly for UPE or UHIL.

E.2.2. SCR BREAKDOWN

A summary of UHIL SCR is provided below with further detail provided in S.25.01.21 in Section F.

Exhibit 32a UHIL SCR Breakdown *

	31 December 2019	31 December 2020
	€'000	€'000
Life Underwriting Risk	138,941	150,333
Health Underwriting	8,796	13,216
Non-Life Underwriting	-	-
Market Risk	96,500	100,515
Counterparty Risk	41,398	42,304
Operational Risk	14,879	13,805
Diversification	(77,782)	(83,958)
Adjustment for the loss-absorbing capacity of deferred	(19,543)	(25,573)
taxes	(17,545)	(23,373)
Solvency Capital Requirement	203,189	210,641

* SCR Breakdown is allowing for Level 3 (Diversification within Risk) and Level 2 (Diversification within Risk Category)

Exhibit 32b UPE SCR Breakdown *

	31 December 2019	31 December 2020
	€'000	€'000
Life Underwriting Risk	138,941	150,333
Health Underwriting	8,822	13,348
Non-Life Underwriting	-	-
Market Risk	119,391	122,969
Counterparty Risk	40,431	41,497
Operational Risk	14,879	13,805
Diversification	(83,743)	(90,164)
Adjustment for the loss-absorbing capacity of deferred	(20,989)	(07.050)
taxes	(20,707)	(27,259)
Solvency Capital Requirement	217,733	224,530

* SCR Breakdown is allowing for Level 3 (Diversification within Risk) and Level 2 (Diversification within Risk Category)

E.3. USE OF THE DURATION-BASED EQUITY RISK SUB-MODULE IN THE CALCULATION OF THE SOLVENCY CAPITAL REQUIREMENT

This section is not applicable to UHIL or UPE.

E.4. DIFFERENCES BETWEEN THE STANDARD FORMULA AND ANY INTERNAL MODEL USED

This section is not applicable to UHIL or UPE.

E.5. NON-COMPLIANCE WITH THE MINIMUM CAPITAL REQUIREMENT AND SOLVENCY CAPITAL REQUIREMENT

UHIL has complied with the MCR and SCR at all times.

UPE has complied with the MCR and the SCR at all times.

E.6. ANY OTHER INFORMATION

No additional information required.
