FUND STRATEGY

The Fund can access exposure to large, medium and small companies through a range of investments including but not limited to equities, mutual funds, exchange traded funds and investment trusts. Our investment managers have the ability to react to markets and can actively adjust across sectors as conditions change.

The managers may allocate to securities directly or indirectly that do not form part of the benchmark. The aim of these "active" allocations are to diversify the investments whilst seeking superior risk adjusted returns relative to the Fund's benchmark. Potential variations in performance of the Fund relative to its benchmark, known as tracking error, are managed by applying soft limits of + or - 3% per annum on a rolling basis. Adherence to these upper and lower targets is not guaranteed and in periods of market stress performance could move outside of this range.

The Fund aims to remain invested through market cycles. We recognise that markets will move both up and down, but this short-term volatility is often less significant when viewed over a longer term.

The Fund is managed with an American focus, however, the Fund may have international exposure through American companies with a Global footprint and on a selective basis overseas companies. Direct currency exposure will be managed relative to the Fund's base currency.
