Our managed funds cater for employees who have varying levels of expertise when it comes to choosing their investments:

- › If they prefer a passive approach to their investments, they can invest in one of our asset allocation models: Lifecycle Strategy Service; or Outcome strategy Funds.
- › If they prefer an active approach to their investments, they can create their own portfolio using our Self-Select Unit-linked Fund Range (including our Guaranteed Return Fund).

# CHOOSING YOUR INVESTMENTS

## 1

### LIFECYCLE STRATEGIES

The Lifecycle strategies seek to achieve positive real returns over the longer-term by investing in a blend of assets based on a policyholder's time to retirement and their risk profile.

The Strategies are available in three risk profiles: Cautious, Balanced and Dynamic.

The glide path approach removes the requirement for employees to adjust their investment elections over time. However, if their risk profile changes they can simply switch from one strategy to another.

## 2

### OUTCOME FUNDS

Our range of Outcome Funds are designed to keep your savings ahead of inflation over the medium to long term. The Funds' structure is based on a combination of historic return analysis along with our long-term expectations of future investment returns.

The funds seek to outperform their inflation targets, over the longer term. They are predominantly designed for investors who are saving for the long term in a pension arrangement.

Our funds, with low, medium and high risk profiles aim to exceed Central Bank inflation targets by 1%, 3% and 4% respectively by maintaining a diverse portfolio of assets.

## 3

### SELF-SELECT FUND RANGE

The Self-Select Fund Range can be used by plan holders who wish to construct their own portfolio and implement their personal investment views. With a broad range of fund choices, many of which are used in our solution based strategies, our customers have the ability to tailor their investment exposure to their own circumstances.

The fund range covers a broad array of geographies and asset classes to be used as the building blocks for diverse investment portfolios.
