Investment Options Brochure

From Utmost Worldwide

1. BEFORE YOU INVEST

- The ownership of the units in the underlying fund resides with Utmost Worldwide Limited at all times. You are not investing in the underlying funds and you do not have any rights or ownership over these underlying investments.
- Vision and Choice are examples of life insurance plans issued by Utmost Worldwide Limited (each a “Plan”).
- Your investment in a Plan is subject to the credit risk of Utmost Worldwide Limited.
- The Premiums paid by you towards your Plan will become part of the assets of Utmost Worldwide Limited and will be used to allocate sub-fund units to your Plan solely for the purpose of calculating the value of your Plan benefits. You do not have any rights or ownership in any of those assets. Your recourse is against Utmost Worldwide Limited only.
- Investment involves risk. The value of your Plan is not guaranteed and can go down as well as up. The return and value of your Plan will be calculated by Utmost Worldwide Limited with reference to the performance and value of the underlying funds and may be lower than the return on the underlying funds due to Plan charges and market fluctuations.
- The value of your Plan may also rise and fall purely on account of currency exchange rate fluctuations if any of the investment options are denominated in a currency other than that of your Plan.
- Although your Plan is a life insurance plan, because the death benefit is linked to the performance of the investment options you choose from time to time, the death benefit is subject to investment risks and market fluctuations. The death benefit payable may be significantly less than the premiums contributed and may not be sufficient for your individual needs.
- Plans issued by Utmost Worldwide Limited are designed for the medium to long-term investor. Early full surrender or partial surrender of a Plan may result in a significant loss of principal. Poor performance of underlying funds may further magnify your investment losses, while all charges are still deductible.
- The investment options available under the Plans can have very different features and risk profiles. Some may be of high risk. In choosing investment options you should read and understand the offering documents of the underlying fund(s) corresponding to your investment option(s), which are available from your Financial Adviser and from Utmost Worldwide Limited on request.
- You are responsible for your investment decisions and any investment option is chosen entirely at your own risk.

Please note that your Plan literature may refer to the International Fund Selection Brochure. This Investment Options Brochure replaces that document.

This brochure contains a list of investment options for you to choose from and each investment option has a corresponding underlying fund.

You should read the offering documents of underlying funds corresponding to the investment options, which are available from Utmost Worldwide Limited upon request, for details of the underlying funds (including, without limitation, the investment objectives and policies, risk factors and charges).

Please note that Utmost Worldwide Limited's Plan literature may refer to the term "investment option" as "investment choice". They both have the same meaning. In this Investment Options Brochure the term "investment option" is used throughout.

Due to potential changes in market conditions, we cannot guarantee that your investment options will continue to be available for investment or redemption.

Utmost Worldwide Limited accepts full responsibility for the accuracy of the information contained in this document (which is correct as at April 2022) and confirm, having made all reasonable enquiries, that to the best of our knowledge and belief there are no other facts the omission of which would make any statement misleading. The value of your policy is linked to the value of your chosen investment options only and therefore this document does not represent an offer for sale or a solicitation to buy any of the underlying funds or any security or investment in any jurisdiction. The value of investment options may fall as well as rise and you may not receive back the full amount that you have contributed to your Plan.

2. A WEALTH OF GLOBAL INVESTMENTS

As a client of Utmost Worldwide you have the opportunity to access an extensive range of top quality investment options, hand-picked to maximise your investment opportunities. Most offer exciting potential for tax-efficient growth from a stable international location and each is managed by world-class professional asset managers.

These investment options range from the secure to those offering capital protection through to those aimed at the more adventurous client. In addition, each has been risk-rated using the Synthetic Risk and Reward Indicator provided by Morningstar Inc., to help you select the investment options that most closely match your investment aims.

This brochure contains a list of investment options for you to choose from and each investment options has a corresponding underlying fund.

3. INFORMATION FOR INVESTORS

3.1 Investment option

At plan commencement, you can select investment options from this brochure of investment options corresponding to underlying funds. Initially, you can select up to ten investment options but these can be changed throughout the life of your plan by use of the switch option. For each investment option selected, you will be allocated sub-fund units¹ corresponding to units in the underlying fund, which represents your investment option.

3.2 Underlying funds

Each of your investment options has a corresponding underlying fund.

Utmost Worldwide will purchase or sell units in the underlying fund corresponding to your investment option. As a result, Utmost Worldwide Limited will allocate or de-allocate sub-fund units of investment options to your plan accordingly. **The ownership of the units in the underlying fund resides with Utmost Worldwide Limited at all times. You are not investing in the underlying funds and you do not have any rights or ownership over these underlying investments.** For each unit of an underlying fund purchased or sold, Utmost Worldwide Limited will allocate or de-allocate a sub-fund unit of investment options corresponding to the underlying fund to/from your plan.

¹ **Sub-fund unit(s):** Premiums will be used to allocate sub-fund units of investment options to your plan corresponding to units in the underlying funds, which represent your chosen investment options. Because of this allocation of sub-fund units to your plan, Utmost Worldwide Limited will purchase units in the corresponding underlying funds. The sub-fund units of investment options are used solely for the purpose of calculating the value of your plan benefits.

The price of a sub-fund unit allocated or de-allocated and representing each investment option is equal to the applicable offer price² or bid price³, respectively. The dealing frequency of each investment option will be the same as that of the corresponding underlying fund.

The sub-fund units of investment options are used solely for the purpose of calculating the value of your plan benefits. The value of your plan benefits at any time is determined by the value of the sub-fund units in your plan. **The return and value of your Plan may be lower than the return on the underlying funds due to Plan charges and market fluctuations.**

Any dividend paid by managers of the underlying funds are re-invested by us to allocate additional sub-fund units of investment options to your plan, in respect of your selected investment options where they correspond to the underlying funds on which the dividends are paid.

Detailed information on the underlying funds themselves including investment restrictions and borrowing powers applicable to the investments of these underlying funds can be found in the relevant underlying fund prospectus published by the underlying fund manager, which is available from your Financial Adviser and from Utmost Worldwide Limited on request. Utmost Worldwide Limited allows borrowing on its own internally managed underlying funds, currently to a maximum of 15% of the total net asset value of the investments held in the fund.

The investment options corresponding to the underlying funds deal monthly, fortnightly, weekly or daily.

3.3 Fees and Charges

In addition to any fees and charges levied by Utmost Worldwide Limited at plan level, the bid / offer spread⁴ and annual management charges of the underlying funds will be incurred. The annual management charge of the underlying funds is in the range of 0.5% to 3% p.a. of the net asset value. The maximum bid / offer spread is 5.75% of the underlying fund which, after applying discounts (if any) negotiated by Utmost Worldwide Limited, is substantially reduced to a maximum of 2% and a minimum of 0%. Annual performance fees (if applicable), may also be applied at the underlying fund level. In addition, other charges may apply to underlying funds. Please note that the fees and charges at the underlying fund level will be reflected in the “total expense ratio” of the fund which is available from your financial adviser on request.

Fund overheads and advisory service fees (advisory service fees of up to 0.75% per annum) are deducted from underlying funds internally managed by Utmost Worldwide Limited and reflected in the relevant unit prices.

Fees and charges (if applicable) at underlying fund level may vary. We will give affected planholders written notice in case of any variation. The period of written notice given will be in compliance with the relevant regulatory requirements.

For detailed information on all fees and charges (both plan level charges and underlying fund level charges), please refer to the relevant Plan Details Guide and the prospectus / offering document of the relevant underlying fund, available from your financial adviser or from Utmost Worldwide Limited on request.

² **Offer price:** The price of a sub-fund unit of an investment option to be allocated, being the published offer price of a unit of the corresponding underlying fund, plus any fee, charge, tax or levy which we incur in purchasing a unit of the underlying fund that is not otherwise included in the published offer price. It is the price of a sub-fund unit used for investments and switches into investment options.

³ **Bid price:** The price of a sub-fund unit of an investment option, being the published bid price of a unit of the corresponding underlying fund, less any fee, charge, tax or levy which we incur in selling a unit of the underlying fund that is not otherwise included in the published bid price. It is the price of a sub-fund unit used in calculating switches out of investment options, and payments of full and partial surrenders, regular withdrawals, death benefit and where sub-fund unit deductions are made to pay plan charges.

⁴ **Bid / offer spread:** The difference between the offer price² and the bid price³.

3.4 Investment Risk

Investment involves risks. Each underlying fund is subject to investment risks e.g. market, interest rate and exchange rate fluctuations. The value of investment options and their performance may go down as well as up. Each investment option will have different features and risk profile and some may be of high risk.

For further details on the 'Investment risk(s)' of each investment option and its corresponding underlying fund, please refer to page 5, Section 4 'Investment risk factors' and also the prospectus / offering document of the relevant underlying fund, available from your financial adviser or from Utmost Worldwide Limited on request.

3.5 Switching

As a Planholder, you may switch your investment options. Switches out of investment options corresponding to underlying funds are processed using the next available bid price, whereas switches into investment options corresponding to underlying funds are processed using the next available offer price. Utmost Worldwide Limited does not currently charge a plan switch fee.

For more detailed information on switching, please refer to the relevant Details Guide for the Plan in which you are investing.

3.6 Withdrawal of an investment option

Utmost Worldwide Limited reserves the right, to withdraw the availability of any investment option and associated underlying fund from the Investment Options Brochure. Fund managers of underlying funds can also withdraw availability of their underlying funds at their discretion. Utmost Worldwide Limited will then have to withdraw the availability of the corresponding investment option.

Withdrawal of an investment option and associated underlying fund can either be applicable to future unit holdings only (in which case existing sub-fund unit holdings can continue to be held) or to both future and existing holdings (in which case existing sub-fund unit holdings must be switched to another investment option).

Utmost Worldwide Limited will give written notice to all affected planholders. As part of this notice, Utmost Worldwide Limited will outline clearly to planholders their options in terms of their existing exposure to the withdrawn investment option and future premium allocation, corresponding to the withdrawn investment option. The options available will reflect the particular circumstances. If no switching instruction or new allocation instruction is received from the planholder before the date specified in the notice, Utmost Worldwide Limited will switch the existing investment option holdings and redirect their future premium allocations to the designated investment options stated in the notice free of charge.

The period of written notice given will be one month's advance notice or such other period of notice in compliance with the relevant regulatory requirements.

4. INVESTMENT RISK FACTORS

4.1 China Market Risk

Investing in securities markets in the People's Republic of China (PRC) is similar to the risks of investing in emerging markets generally and the risks specific to the PRC market. The national regulatory and legal framework for capital markets in the PRC are still developing and may not be as mature as other developed economies. Investments in the PRC will be sensitive to any significant change in political, social and economic policy in the PRC. The government's control over currency conversion and exchange rates as well as repatriation policies will also affect the operations and financial results of companies investing in the PRC. The underlying fund may also be subject to PRC withholding and other taxes imposed within the PRC. Investors should be aware that their investments may be adversely affected by changes in PRC tax law and regulations, which are constantly in a state of flux and will change constantly over time.

4.2 Commodities Risk

Where underlying funds have exposure to commodities, this can involve additional risks to those resulting from traditional investments and may subject the underlying fund to greater volatility. The value of commodity-linked instruments may be affected by overall market movements, commodity index volatility, changes in interest rates, or factors affecting a particular commodity industry or the production and trading of commodities, such as natural events (e.g. drought, floods, weather, and livestock disease), embargoes, tariffs and international economic, political and regulatory developments.

4.3 Concentration Risk

Underlying fund investments may be concentrated in a particular market / industry sector e.g. gold and precious metals sector, which may include investments in commodities-linked Exchange Traded Funds (ETFs). The underlying fund may be subject to greater volatility and more rapid cyclical changes than those investing in a wide range of sectors.

4.4 Counterparty Risk

Underlying funds may be exposed to a credit risk on parties with whom they trade securities and derivatives, and may also bear the risk of counterparty default. To the extent that a counterparty defaults on its obligation and the underlying fund is delayed or incapable of exercising its rights with respect to the investments in its portfolio. The underlying fund may be adversely affected by experiencing a decline in the value of its position, lose income and incur costs associated with asserting its rights.

4.5 Credit Risk

Investment in bonds or other fixed income securities are subject to the risk that issuers fail to make payments on interest and/or principal of such securities. An issuer suffering from an adverse change in its financial condition could lower the quality of a security leading to greater price volatility on that security. A security having a low credit rating may decrease its liquidity and make it more difficult to liquidate. Non-investment grade bonds are more susceptible to these problems and the value of such securities may be more volatile. This risk, if realised, would have an adverse effect on the net asset value of underlying funds exposed to such securities. In the event of a bankruptcy or other default of a security issuer, underlying funds may experience both delays in liquidating the underlying securities and associated losses including a possible decline in value of the underlying securities during the period when the underlying fund seeks to enforce its rights thereto. Securities which were investment grade at the time of acquisition may be downgraded. The risk of any such downgrading will vary over time.

4.6 Currency Risk

The potential risk of loss from fluctuating foreign exchange rates when an investor has exposure to foreign currency or in foreign-currency traded investments. The currency of your plan may differ from the currency of the investment options which you hold within this plan. Utmost Worldwide Limited will use the commercial rate of exchange (foreign exchange rate) where we are required to convert plan investment or plan pay-outs from one currency to a different one. It consists of a market rate to which we will add a margin of up to 1% depending on the currency pair in question. Market rates are sourced from the Bloomberg market data service and updated daily.

4.7 Early Termination Risk

Underlying funds may be liquidated on the occurrence of certain events (see below for examples). Upon liquidation, all the assets of the underlying fund will be realised and the net proceeds thereof which are available for distribution will be distributed to its planholders in proportion to their holdings. Investors should note that the amount distributed to them may be less than the amount of their initial investment.

In general, the following circumstances may lead to termination of an underlying fund:

- a) if the manager of the underlying fund goes into forced liquidation or becomes incapable of performing its duties properly; or

- b) if the underlying fund ceases to be authorised under the relevant regulations in Hong Kong or any law or regulation is passed in any jurisdiction which makes it illegal, impracticable or inadvisable to continue the underlying fund; or
- c) if a change in the economic or political situation relating to the underlying fund concerned would justify the termination of the underlying fund or if the interests of the planholders would justify it.

4.8 Equity-Linked Notes (ELNs) Risk

ELNs, involve a counterparty structuring a note whose value is intended to move in line with the underlying security specified in the note. In the event that the counterparty (structurer of the note) defaults, the risk to the underlying fund which holds the ELN is linked to that of the counterparty, irrespective of the value of the underlying security within the note. The liquidity of an ELN can be less than that for the underlying security, a regular bond or debt instrument and this may adversely affect either the ability to sell the position or the price at which such a sale is transacted.

4.9 Emerging Markets Risk

The underlying fund invests in global companies with exposure to emerging markets. Exposure to emerging markets involves a greater risk of loss than exposure to more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity, market volatility (such as interest rate and price volatility) and regulatory risks.

4.10 Equity Risk

The value of the underlying funds that invest in equity securities (i.e. company stocks and shares) will be affected by changes in the market price. The price will be influenced by the outlook of those companies, general economic, industry and market trends.

4.11 Financial Derivative Instruments (FDIs) Risk

Participation, direct or indirect investment, in derivative instruments such as warrants, futures and options by an underlying fund will expose the fund to the specific risks associated with such instruments including exposure to the credit quality of the counterparty. Depending on the type of instrument, the exposure to downward movement in the value of such instruments may or may not be limited. Investment in derivative transactions may result in losses in excess of the amount invested. Such instrument transactions are typically “geared” in that the initial outlay is small relative to the value of the contract. Thus a relatively small market movement in the assets to which the instruments relate will have a proportionately larger impact on the value of the instrument itself.

4.12 Foreign Investment Restrictions Risk

Some countries prohibit or restrict investment, or the repatriation of income, capital or the proceeds from sale of securities or assets. Underlying funds may incur higher costs investing in these countries. Such restrictions may delay the investment or repatriation of capital of the underlying fund.

4.13 Hedging Risk

The underlying fund manager of the security in which the underlying fund may invest is permitted, but not obliged, to use hedging techniques to attempt to offset market and currency risks. There is no guarantee that hedging techniques will achieve the desired result.

4.14 Inflation Risk

This type of risk refers to the possibility of a reduction in the real value of underlying fund assets. Inflation risk surfaces when the inflation tends to decrease the purchasing capacity of a currency whether it is invested or not. Inflation risk can destabilise and weaken the performance of an investment.

4.15 Interest Rate Risk

Investment risk associated with the possibility that there is a rise in the interest rates after a fixed income fund (such as bonds) has been purchased resulting in a decline in that bond's price.

4.16 Liquidity Risk

This type of risk arises from situations in which an investor engaging in underlying funds trading cannot do so because nobody in the market wants to trade that asset. These underlying funds may be difficult to value and will be traded at a price that is significantly lower than its value.

4.17 Money Market Instruments Risk

Money market instruments in which the underlying fund invests are subject to the solvency of the relevant underlying issuer. The buying and selling of money market instruments is exposed to liquidity constraints in the market. While every effort will be made to maintain the capital value of the underlying fund, this may be the case as a loss made on an instrument held by the underlying fund could reduce the capital value of the underlying fund.

4.18 Political Risk

This is the risk that revolution, political conditions or uncertainties will affect the value of the underlying fund.

4.19 Qualified Foreign Institutional Investor (QFII) Risk

The QFII policy and rules are subject to change and any such change could adversely impact the performance of the underlying funds. The underlying fund invests in China A Shares directly through QFII scheme and indirect investments in China A Shares through China A Shares Access Products (CAAPs).

The underlying fund's investments made through the QFII Holder are subject to the prevailing exchange controls and other prevailing requirements of the People's Republic of China ("PRC") including rules on investment restrictions, lock-up period and repatriation and remittance of principal and profits. The capacity of the underlying fund to make investments, and thus the value of the underlying fund, may be affected.

The current QFII policy and QFII regulations are subject to change, which may take retrospective effect. In addition, there can be no assurance that the QFII regulations will not be abolished. The underlying fund, which invests in the PRC markets through the QFII Holder, may be adversely affected as a result of such changes.

The QFII licence held by the QFII Holder may be revoked or terminated or otherwise invalidated at any time. In such event, all the assets held by the PRC QFII Custodian for the account of the underlying fund will be liquidated and repatriated to a bank account maintained for and on behalf of the underlying fund outside of the PRC in accordance with applicable laws and regulations. The underlying fund may be required to dispose of its securities holdings and may suffer significant loss as a result of such liquidation and repatriation.

The underlying fund may also be subject to repatriation restrictions such as lock-up period. In particular, under the QFII regulations, there are foreign exchange control restrictions imposed on the repatriation of funds by the QFII Holder. The underlying fund will be restricted from withdrawing investment capital from the cash accounts of the underlying fund during the lock-up period, which will expire on 26th June 2014. After the lockup period, the underlying fund may repatriate capital, dividends, interest and income from the PRC, however any such repatriation is subject to a monthly cumulative limit of 20 per cent of the total onshore assets managed by the QFII Holder (or managed through its group companies including the manager) as a QFII as at the end of the preceding year. The restrictions on repatriation of the investment capital and net profits may have impact on the underlying fund's ability to meet the redemption requests of its unit-holders.

Custodians or sub-custodians may be appointed in local markets for purpose of safekeeping assets of the underlying fund in those markets. Where the underlying fund invests in eligible securities through the QFII quota held by the QFII Holder, such securities will be maintained by the PRC QFII Custodian through one or more securities account(s), in accordance with PRC law and the underlying fund may be subject to custodial risk. If the PRC QFII Custodian defaults, the underlying fund may suffer substantial losses. The assets, including cash, held by the PRC QFII Custodian belong to the underlying fund as the ultimate beneficial owner, and they are segregated from the assets of the manager, the QFII Holder, the QFII Custodian, the PRC QFII Custodian, the PRC brokers, and their respective clients.

There can be no assurance that the QFII Holder will continue to make available its QFII quota, or the underlying fund will be allocated a sufficient portion of QFII quota to meet all applications for subscription to the underlying fund. The performance of the underlying funds may therefore be adversely affected due to limited investment capabilities, or the underlying fund may not be able to fully implement or pursue its investment objective or strategy.

Please be aware of the risks associated with the underlying fund of Value Partners China Convergence Acc Fund - USD. Please refer to the offering documents of the underlying fund for more details.

4.20 Real Estate Securities Risk

Underlying funds which hold real estate securities are subject to substantially the same risks as direct investments in real estate. Real estate values fluctuate depending on factors such as local, regional and national economic environment, rental market demand, interest rates changes, as well as the management, organization, skill and capital funding of the managers and operators of the underlying properties. When the economy slows down or if interest rates rise, mortgage and financing costs will increase and can affect the profitability and liquidity of properties in the real estate market. This can potentially lead to declines in property values and hence adversely affect the value of associated investments.

4.21 Smaller Companies / Mid-sized Companies Risk

Smaller companies / mid-sized companies are subject to the risk of greater vulnerability to the release of unfavourable market news and information and poor economic or market conditions. Market for smaller companies / mid-sized companies is generally of lower liquidity. Therefore underlying funds with exposure to such companies may fluctuate in value more than other underlying funds because of the greater volatility of share prices of smaller companies. Investment in small cap companies may have higher than average volatility and liquidity risks.

4.22 Single Countries Risk

Underlying funds may invest in single countries and therefore have a narrower focus than those underlying funds which invest broadly across markets. This may increase the potential volatility of the underlying fund.

4.23 China A Shares Risk

Underlying funds may invest in China A shares directly through the QFII scheme (subject to the approval of relevant Chinese authorities) and may incur losses due to limited investment opportunities, or may not be able to fully implement or pursue its investment objectives or strategy, due to QFII investment restrictions, illiquidity of the China A shares market, and/or delay or disruption in execution of trades or in settlement of trades. Please be aware of the risks associated with the underlying funds of Fidelity China Consumer Fund A – EUR, Fidelity China Consumer Fund A – USD and Fidelity Funds – Greater China Fund A Inc. Please refer to the offering documents of the relevant underlying funds for more details.

4.24 Conflicts of Interest

Underlying funds may be subject to conflicts of interests that may or may not be disclosed in the offering document of the underlying fund, including direct or indirect financial or governance relationships with service providers, brokers, advisers and other intermediaries or their respective directors and employees, including but not limited to commission and retrocession arrangements using soft dollars or otherwise. It is recommended that you request your financial adviser to disclose any actual or potential conflict of interests in relation to any investment option that you may select.

You should note that the underlying funds of the investment options listed in this Brochure pay a retrocession commission to Utmost Worldwide Limited of between 0% and 1% p.a. They pay this out of the annual management charge described in section 3.3. It is not an additional charge to you. The retrocession commission has the potential to create a conflict of interest of Utmost Worldwide Limited as regards the selection of underlying funds which pay higher levels of retrocession commission. However this conflict is mitigated through strict adherence to our defined fund selection and monitoring criteria.

Due to potential changes in market conditions, we cannot guarantee that investment options selected by you will continue to be available for investment or redemption. In the event of withdrawal of an investment option we will propose an alternative for you.

INVESTMENT OPTIONS GUIDE

Risk ratings:

SRRI Annualised Volatility Intervals Rating

1.	Equal to or Above 0.0% but less than 0.5%
2.	Equal to or Above 0.5% but less than 2%
3.	Equal to or Above 2% but less than 5%
4.	Equal to or Above 5% but less than 10%
5.	Equal to or Above 10% but less than 15%
6.	Equal to or Above 15% but less than 25%
7.	Equal to or Above 25%
8.	Unclassified Not rated

Abbreviations:

DF	Dealing Frequency.
AMC	Annual Management Charge.
PF	Annual Performance Fee (of profit on a high-on-high basis).

Symbols:

†	NOT AUTHORISED IN HONG KONG Please note that investment options marked with this symbol correspond to underlying funds which are NOT authorised in Hong Kong and hence are NOT available for offering to Hong Kong investors.
#	Investment options marked with this symbol correspond to underlying funds which are categorised as Undertakings for Collective Investment in Transferable Securities (UCITS).
\$	Investment options marked with this symbol correspond to underlying funds which are internally managed by Utmost Worldwide Limited. Please note that these are not available for offering to Hong Kong investors.
□	Investment options marked with this symbol correspond to underlying funds which are authorised by the Securities and Futures Commission (SFC) in Hong Kong under the SFC Code on Unit Trusts and Mutual Funds and not under the SFC Code on Real Estate Investment Trusts (REITs). Such authorisation does not imply official approval or recommendation by the SFC. The underlying REITs may not necessarily be authorised by the SFC, and the dividend policy / payout policy of these underlying funds is not representative of the dividend policy / payout policy of their underlying REITs.
◆	These investment options are NOT authorised in Singapore and hence not available for offering to Singapore investors.
~	Investment options marked with this symbol correspond to investment options which are not available for offering to investors in the EEA and Switzerland.

SYNTHETIC RISK AND REWARD PROFILE

Industry Standard

To help you select the investment options that best fit with your approach to risk, Utmost Worldwide Limited uses the Synthetic Risk and Reward Indicator (SRRI)[^]. This does not constitute investment advice and should be used as a guidance tool only.

The indicator is calculated based on the volatility of the investment option for the past five years and the values obtained are translated into one of the seven risk categories available based on pre-defined volatility intervals (see below).

Risk Classes

Low number = Low volatility. High number = High volatility

	Risk Scale	Annualised Volatility Intervals	
		Equal or Above	Less than
	U*	-	-
Potentially lower reward	1	0.0%	0.5%
	2	0.5%	2%
	3	2%	5%
	4	5%	10%
	5	10%	15%
Potentially higher reward	6	15%	25%
	7	25%	-

*Investment options marked with the symbol 'U' indicate that there is currently insufficient data available to calculate an SRRI.

[^] The 'Synthetic Risk and Reward Indicator' (SRRI) was defined in 2009 by the Committee of European Securities Regulators (CESR) with the aim of providing investors with a method of assessing an underlying fund's risk. This SRRI calculation has been provided by Morningstar based on guidelines provided by the European Securities and Markets Authority (ESMA) and Morningstar's interpretation, methodology and implementation of said guidelines.

Not all investment options on the Utmost Worldwide Limited unit-linked investment option range can be assigned a synthetic risk and reward indicator. This may occur where not all of the relevant calculation information is available. For example, if the investment option is less than 5 years old, the annualised volatility over 5 years cannot be calculated. These investment options appear under the category ‘Unclassified’.

Each investment option on the unit-linked range has been assigned a risk category where possible. For example, investment options with very low volatility will have a 1 or 2 rating on the risk scale. These investment options generally have a more cautious approach with little or no exposure to equity markets and usually invest in cash or money market securities. You should be aware that for investment options considered lower risk, the potential for reward will be lower as these investment options are expected to yield lower returns than investment options with a high equity exposure.

Please note that the investment option’s categorisation is not constant and may change over time.

Investment options with high volatility will have a 6 or 7 rating on the risk scale. These investment options tend to have a high exposure to less developed, emerging equity markets or use high risk alternative assets within their investment strategy. Over the long term, exposure to equity markets could provide the opportunity for higher investment returns however it also brings a higher degree of investment risk. Although investment gains could be made when markets are buoyant, losses can quickly occur when markets take a downturn. You must therefore be prepared not only for the potential for higher returns but also the potential for higher losses when investing in these types of investment options.

Risk Scale

You should note that investment involves risk. Past performance is not indicative of future performance. Investors and/or their investment advisers are responsible for their investment decisions and any choice of investment options is entirely at their own risk. Please note that investment performance (as well as the income accruing to an investment) may go down as well as up.

Important Notes

‘Annualised Volatility Intervals’ as defined in the grid above reflect the increasing level of risk borne by the investment option and, therefore, its position in the risk scale. Volatility is a measure of variance of a financial instrument’s price over a particular time period, which means the greater the movement in investment option prices, the more volatile the investment option’s performance is. Investment options with high volatility are generally associated with higher risk but potentially higher reward. Investment options with low volatility are generally associated with lower risk but with lower potential reward.

EQUITY GLOBAL**SRRI RATING – 3****NINETY ONE FUNDS SERIES IV MULTI-ASSET PROTECTOR FUND**

◆ †

Aim: The Fund aims to grow your investment over the long term and provide protection (the minimum amount you can expect to get back from your investment) at 80% of the Fund's highest ever share price. The Fund invests around the world in a wide range of investments. These include shares of companies (up to 85%); bonds (contracts to repay borrowed money which typically pay interest at fixed times issued by governments or companies); property; commodities; cash (up to 100%); and other eligible asset classes. Investment may be directly in the assets themselves (excluding property and commodities) or indirectly through other funds (up to 100%). The Fund may invest more than 35% of its assets in securities issued or guaranteed by an EEA state. The Fund may also use derivatives (financial contracts whose value is linked to the price of an underlying asset) for investment purposes and one of the ways the Fund seeks to provide the 80% protection is through investment in a derivative contract. The cost of this contract is between 0.15-0.5% and is charged to the Fund. This cost is in addition to the Fund's ongoing charge.

FUNDSMITH EQUITY FUND R ACC
†

Aim: The investment objective of the Fund is to achieve long-term growth in value through investing in equities on a global basis. The Company's approach is to be a long-term investor in its chosen stocks, it will not adopt short-term trading strategies. The company has stringent investment criteria which the ACD (Authorised Corporate Director) and Fundsmith Investment Services Limited adhere to in selecting securities for the Company's investment portfolio. The application of these investment criteria significantly limit the number of potential investments which the ACD will consider to be appropriate. It is envisaged that the investment portfolio will be concentrated, generally comprising between 20 and 30 stocks.

EQUITY SINGLE COUNTRY (CONTINUED)**SRRI RATING – 6****VALUE PARTNERS CHINA CONVERGENCE ACC FUND - USD**

Aim: The Fund aims to provide Unitholders with long-term capital appreciation, currently by investing primarily (i.e. not less than 70% of the Sub-Fund's Net Asset Value) in equity securities of China-related companies listed on a stock exchange in mainland China, the Hong Kong Stock Exchange or on major/recognised stock exchanges in other jurisdictions (including but not limited to A, B and H Shares and American Depositary Receipts ("ADRs")). For the purpose of the Sub-Fund, China-related companies are considered by the Manager to be companies which are based in or have their principal operation in China or have the majority of their assets situated in, or the majority of their revenue, income or profits derived from China. As a result of this change, the Sub-Fund may be exposed to risks associated with ADRs. Although ADRs have risks similar to the securities that they represent, they may also involve higher expenses and may trade at a discount (or premium) to the underlying security. In addition, depositary receipts may not pass through voting and other shareholder rights and may be less liquid than the underlying securities listed on an exchange.
