FUND STRATEGY

The Fund will seek exposure to commodities, infrastructure and real estate through listed securities. This is achieved by predominately investing into mutual funds, exchange traded funds and investment trusts. Our investment managers have the ability to react to markets and actively adjust across asset classes and sectors.

The Fund aims to remain invested through market cycles. We recognise that markets will move both up and down, but this short-term volatility is often less significant when viewed over a longer term.

To align the Fund with its objective, the investment managers establish their strategic asset allocation model with scope for tactical variations, using long-term investment projections, adjusted according to the relative valuations of each asset class. On a ten to fifteen year view, the Fund will usually hold:

- 0% to 60% Listed commodities securities
- 0% to 60% Listed infrastructure securities
- 0% to 60% Listed real estate securities

The Fund is managed on a Global basis and can invest in all major currencies. The managers can reduce currency risk if deemed appropriate.

With the aim of improving value to policyholders, by reducing third-party fees, our managers target low cost index funds and institutional mutual fund share classes.
