Investment Options[^] Performance

As our client, you have the opportunity to access an extensive range of top quality investment options, hand-picked to maximise your investment opportunities. Most offer exciting potential for tax-efficient growth from a stable international location and each is managed by world-class professional asset managers. These investment options range from the secure to those offering capital protection through to those aimed at the more adventurous client. In addition, each has been risk-rated to help you select the investment options that most closely match your investment aims. A summary of each risk category is shown here. These investment options are related to our full range of unit-linked products (known as investment-linked products in Singapore and investment-linked assurance schemes in Hong Kong) and further details of the investment options are available in our Investment Options Brochures.

International version: [Utmost Worldwide IOB](#)

Singapore version: [Utmost Worldwide Singapore ILP Sub-Fund Brochure](#)

Switzerland version: [Utmost Worldwide Switzerland IOB](#)

Hong Kong version: [Utmost Worldwide HK \(English\) IOB](#) and [Utmost Worldwide HK \(Cantonese\) IOB](#)

Note to Swiss residents: The Investment Options Brochure includes access to the prospectus and offering documents of the underlying funds which provide detail of, without limitation, the investment character, investment objectives and policies, country of domicile, investment opportunities, risk factors and charges.

Past performance is not indicative of future performance. Investment decisions are the sole responsibility of the planholder(s) and any choice of investment options is entirely at their own risk. It is strongly recommended that planholders should seek independent investment advice that is tailored to their individual circumstances and obtained from a suitably qualified and regulated investment adviser. Please note that your capital is at risk and the value of your plan and your selected investment options may go down as well as up meaning that you may receive back from your plan less than you have contributed. The performance figures are net of all fund charges but do not take account of any initial charge.

These performance figures should be read in conjunction with the relevant principal brochure, as fees and charges will impact negatively on individual investment returns.

[^] Investment Option(s) are referred to as ILP Sub-Fund(s) in Singapore therefore, all references to Investment Option(s) throughout this document are referring to ILP Sub-Fund(s) In Singapore.

Synthetic Risk and Reward Profile

Industry Standard

Please note that Utmost Worldwide Limited does not provide investment or financial advice with regard to underlying funds. To help you select the investment options that best fit with your approach to risk, you have the possibility to assess an underlying fund's risk with the Synthetic Risk and Reward Indicator (SRRI)[^]. This does not constitute investment advice and should be used as a guidance tool only.

The indicator is calculated based on the volatility of the investment option for the past five years and the values obtained are translated into one of the seven risk categories available based on pre-defined volatility intervals.

Risk Classes

Low number = Low volatility, High number = High volatility

	Risk Scale	Annualised Volatility Intervals	
		Equal or Above	Less than
	U*	-	-
Potentially lower reward	1	0.0%	0.5%
	2	0.5%	2%
	3	2%	5%
	4	5%	10%
	5	10%	15%
	6	15%	25%
Potentially higher reward	7	25%	-

*Funds marked with the symbol 'U' indicate that there is currently insufficient data available to calculate an SRRI.

FOR MORE DETAILED INFORMATION ON ANY OF THE INVESTMENT OPTIONS, PLEASE VISIT OUR MORNINGSTAR FUNDS PLATFORM, WHICH CAN BE FOUND ON OUR ONLINE SERVICE CENTRE OR WEBSITE [UTMOSTINTERNATIONAL.COM/WEALTH-SOLUTIONS/CUSTOMER-SUPPORT](https://www.utmostinternational.com/wealth-solutions/customer-support)

Not all investment options on the Utmost Worldwide unit-linked investment option range can be assigned a synthetic risk and reward indicator. This may occur where not all of the relevant calculation information is available. For example, if the investment option is less than 5 years old, the annualised volatility over 5 years cannot be calculated. These investment options appear under the category 'Unclassified'.

Each investment option on the unit-linked range has been assigned a risk category where possible. For example, investment options with very low volatility will have a 1 or 2 rating on the risk scale. These investment options generally have a more cautious approach with little or no exposure to equity markets and usually invest in cash or money market securities. You should be aware that for investment options considered lower risk, the potential for reward will be lower as these investment options are expected to yield lower returns than investment options with a high equity exposure.

Investment options with high volatility will have a 6 or 7 rating on the risk scale. These investment options tend to have a high exposure to less developed, emerging equity markets or use high risk alternative assets within their investment strategy. Over the long term, exposure to equity markets could provide the opportunity for higher investment returns however it also brings a higher degree of investment risk. Although investment gains could be made when markets are buoyant, losses can quickly occur when markets take a downturn. You must therefore be prepared not only for the potential for higher returns but also the potential for higher losses when investing in these types of investment options.

Risk Scale

You should note that investment involves risk. Past performance is not indicative of future performance. Investors and/or their investment advisers are responsible for their investment decisions and any choice of investment options is entirely at their own risk. Please note that investment performance (as well as the income accruing to the investment) may go down as well as up.

IMPORTANT NOTES

Annualised Volatility Intervals reflect the level of risk borne by the investment option and, therefore, its position on the risk scale. Volatility is a measure of variance of a financial instrument's price over a particular time period, which means the greater the movement in investment option prices, the more volatile the investment option's performance is. Investment options with high volatility are generally associated with higher risk but potentially higher reward. Investment options with low volatility are generally associated with lower risk but with potentially lower reward.

Please note that the investment option's categorisation is not constant and may change over time.

Morningstar Inc. is an independent entity to Utmost Worldwide Limited.

^The 'Synthetic Risk and Reward Indicator (SRRI)' was defined in 2009 by the Committee of European Securities Regulators (CESR) with the aim of providing investors with a method of assessing an underlying fund's risk. This SRRI calculation has been provided by Morningstar based on guidelines provided by the European Securities and Markets Authority (ESMA) and Morningstar's interpretation, methodology and implementation of said guidelines.
