### FUND STRATEGY

The Fund can access multiple asset classes through mutual funds, exchange traded funds and investment trusts, with our investment managers having the ability to react to markets and actively adjust across asset classes and sectors.

The Fund aims to remain invested, through market cycles. We recognise that markets will move both up and down, but this short-term volatility is often less significant when viewed over a longer term.

To align the Fund with its objective, the investment managers establish their strategic asset allocation model with scope for tactical variations, using long-term investment projections, adjusted according to the relative valuations of each asset class. On a ten to fifteen year view, the Fund will usually hold:

75% to 100%	Equities
0% to 25%	Fixed Income
0% to 25%	Other

The Fund is managed with a European Union bias and whilst it can invest in all major currencies, it is likely that at least 50% of the fund will be in Euro assets at any time.

With the aim of improving value to policyholders, our managers target institutional share classes reducing, where possible, third-party fees.
