Jupiter Asset Management International S.A. (the "Management Company") is authorised in Luxembourg and supervised by the CSSF.

Date of Publication: 14/02/2025

What is this product?

Type: Jupiter Global Ecology Growth (the "Fund") is a sub-fund of a SICAV (société d'investissement à capital variable), The Jupiter Global Fund, incorporated in Luxembourg.

Term: The Fund has no maturity date. The Management Company is not entitled to terminate the Fund unilaterally.

Objective: The Fund's objective is to generate long-term capital growth and income by investing primarily in global equity securities that focus on making a positive impact towards environmental and sustainable objectives.

The Fund invests primarily (at least 70% of its Net Asset Value) in equity and equity-related securities globally (including emerging markets). The Fund's investments are issued by companies considered by the Investment Manager to be addressing global environmental and sustainability challenges by being substantially focused on activities generating or enabling a positive impact across any of the following sustainable solution themes: Clean energy; Green mobility; Green buildings and industry; Sustainable agriculture and land ecosystems; Sustainable oceans and freshwater systems; and Circular economy. Investments will be substantially orientated towards the sustainable solutions themes (typically by assessing indicators such as the level of revenue, profit or capital expenditure related to economic activity that is contributing to the themes) which in turn focuses the investment universe on a sub-set of equity securities.

The Investment Manager will screen companies using proprietary and third-party research to formally exclude investment into companies with activities and operations contradicting the principles of the United Nations Global Compact. The Investment Manager also formally excludes investments in companies (i) that have direct exposure to controversial weapons or coal extraction, (ii) that generate more than 5% of revenues from oil sands or shale extraction; alcohol production; adult entertainment; conventional weapons (small arms and/or military contracting for weapons purposes); gambling; tobacco production; nuclear energy generation and uranium mining, or (iii) that derive over 10% of their revenues from thermal coal generation.

The Fund may also hold up to 30% of its Net Asset Value (in aggregate) in units of collective investment schemes, cash, deposits and money market instruments. The Fund will not invest more than 20% of its Net Asset Value

in China A-shares via Stock Connect. The Fund has a sustainable investment objective coming within scope of article 9 of SFDR.

The Fund's benchmark is the MSCI All Country World Index. The Fund is actively managed and uses the benchmark for index performance comparison purposes only. This means the Investment Manager is taking investment decisions with the intention of achieving the Fund's investment objective without reference to a benchmark. The Investment Manager is not in any way constrained by a benchmark in its portfolio positioning. The benchmark is not designated in respect of the sustainability investment objective of the Fund.

Any income arising in relation to this share class is distributed on an annual basis. By default this distribution will be automatically reinvested to purchase more shares, unless you inform us that you wish to receive this income.

Investors are able to buy and sell shares during any business day. If you tell us to buy or sell shares before 1pm (Luxembourg time) on any business day we will make the transaction on the same day. If you tell us to buy or sell shares after 1pm (Luxembourg time) we will make the transaction on the following business day.

Intended retail investor: The type of investor for whom the Fund is intended may include retail investors with no financial industry experience. Investors should be aware that a capital loss of some or all of the amount invested may occur. An investment in a particular Fund should be considered in the context of an investor's overall investment portfolio.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Fund as 4 out of 7 which is a medium risk class. This rates the potential losses from future performance at a medium level. Poor market conditions could affect the value of your investment.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other key material risks not captured by the risk indicator that could potentially impact the Fund are disclosed in the Prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment. However, you may benefit from a consumer protection scheme (see the section 'what happens if we are unable to pay you'). The indicator shown above does not consider this protection.

Performance Scenarios

What you will get from this Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

| | | | |
|------------------------------------|--|---------------------------------|----------------------------------|
| Recommended holding period: | | 5 years | |
| Example Investment: | | GBP 10 000 | |
| | | If you exit after 1 year | If you exit after 5 years |
| Scenarios | | | |
| Minimum | There is no minimum guaranteed return if you exit before 5 years. You could lose some or all of your investment. | | |
| Stress | What you might get back after costs | GBP 4 050 | GBP 3 430 |
| | Average return each year | -59.50% | -19.27% |
| Unfavourable | What you might get back after costs | GBP 8 100 | GBP 8 990 |
| | Average return each year | -19.00% | -2.11% |
| Moderate | What you might get back after costs | GBP 10 100 | GBP 14 100 |

| | Average return each year | 41.30% | 12.25% |

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment between 2021 and 2024.

Moderate scenario: This type of scenario occurred for an investment between 2019 and 2024.

Favourable scenario: This type of scenario occurred for an investment between 2016 and 2021.

What happens if Jupiter Asset Management International S.A. is unable to pay out?

There is no compensation scheme or guarantee scheme in the event that the Company (or any other party including the Management Company) is unable to pay out.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- 10 000 GBP is invested.

| | | |
|------------------------|---------------------------------|----------------------------------|
| | If you exit after 1 year | If you exit after 5 years |
| Total costs | GBP 675 | GBP 1 982 |
| Annual cost impact (*) | 6.8% | 2.9% each year |

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.0 % before costs and 7.1 % after costs.

Composition of Costs

| | | |
|---|--|---------------------------------|
| One-off costs upon entry or exit | | If you exit after 1 year |
| Entry costs | 5.00 % of the amount you pay in when entering this investment. | Up to GBP 500 |
| Exit costs | We do not charge an exit fee for this product. | GBP 0 |
| Ongoing costs taken each year | | |

| Transaction costs | 0.02 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell. | GBP 2 |
| Incidental costs taken under specific conditions | | |
| Performance fees (and carried interest) | There is no performance fee for this product. | GBP 0 |

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

The Fund's shares are designed to be held over the long term and may not be suitable as short-term investments. There is no guarantee that any appreciation in the value of the Fund's investments will occur and investors may not get back the full value of their investments. The value of the shares and the income derived from them (if any) may go down as well as up.
