INTERNATIONAL FUND SELECTION FROM UTMOST PANEUROPE

BEFORE YOU INVEST

- › The client is responsible for the choice of Funds and any choice of Funds is entirely at the clients own risk.
- › The value of each Fund is not guaranteed and can go up as well as down. Past performance of Funds are not a guarantee of future performance.
- › The value of each Fund is subject to market, interest rate and exchange rate fluctuations.
- › Partial Surrenders will reduce the value of your Utmost PanEurope Plan.
- › Before making any decision or taking any action that may affect your personal finances or business, you should consult with your Insurance Intermediary or professional adviser to ensure that the Funds meet your specific requirements.

A WEALTH OF GLOBAL INVESTMENTS

As a client of Utmost PanEurope dac (Utmost PanEurope) you have the opportunity to access an extensive range of Funds. Most offer exciting potential for tax-efficient growth from a stable international location and each is managed by world class professional asset managers.

These Funds range from the low risk to those offering capital protection through to those aimed at the more adventurous client. In addition, each has been risk-rated to help you select the Funds that most closely match your attitude to risk.

IMPORTANT FUND INFORMATION

The bid price of units in each Fund is used to determine the value of your units of the Fund. Bid prices are calculated by the relevant Fund manager by taking a market valuation of the investments in each Fund and dividing by the number of units in each Fund.

Funds deal monthly, fortnightly, weekly or daily. Please see the individual Fund Prospectus for further information.

Fund charges

The following charges apply to Funds:

- › The initial charge (bid/offer spread);
- › Annual Management Charges;
- › Other charges as specified in the Fund documentation;
- › Utmost PanEurope charges as specified in the Terms and Conditions.

Different Funds will have different charges. You should read and understand the Fund Factsheets of the Funds you select to ensure that you understand the charges applicable to your Funds. If you have any queries, you should contact your Insurance Intermediary or Utmost PanEurope.

As a guide the Annual Management Charge ranges from 0.5% to 3% p.a. of the net asset value. The maximum bid/offer spread or initial charge is 5.75% of the underlying Fund which, after applying discounts negotiated by Utmost PanEurope, is substantially reduced to a maximum of 2% and a minimum of 0%.

Fund houses reserves the right to alter their charges. 3 months' notice, where possible, will be given on all changes.

Fund risks

Each Fund is subject to market, interest rate and exchange rate fluctuations, as well as other risks. The value of Funds and their yields may go down as well as up. Different Funds will have different level of risks. Please see the SRRI rating explanation for a guide to the level of risk. For further details, please refer to the individual Fund prospectus.

Past performance is shown for indication only and is not a guide to future Fund performance.

Utmost PanEurope reserve the right to exchange any of the units allocated to your plan for units in another Fund. If this happens, we will attempt to give you 3 months' notice.

Further information

This guide provides details on the SRRI risk rating as well as a general list of the Funds offered by Utmost PanEurope. Fund prospectus and factsheets are available on Morningstar which can be accessed via Utmost PanEurope's Service Centre. You can also contact your Insurance Intermediary and Utmost PanEurope if you require further information.

Important

Please note that this guide is not intended as a recommendation that you select certain Funds. You should seek independent advice from your insurance intermediary or professional adviser before making any decisions. This document should be read in conjunction with the individual Fund factsheet and the relevant product literature.

This information is correct as at April 2025.

Due to potential changes in market conditions, we cannot guarantee that Funds corresponding to your choices will continue to be available for investment or redemption. In the event of withdrawal of an investment option Utmost PanEurope will propose an alternative for you.

INTERNATIONAL FUND SELECTION GUIDE

SYNTHETIC RISK AND REWARD PROFILE

Industry Standard

To help you select the funds that best fit with your approach to risk, Utmost PanEurope uses the Synthetic Risk and Reward Indicator (SRRI) [^].

The indicator is calculated based on the volatility of the fund for the past five years and the values obtained are translated into one of the seven risk categories available based on pre-defined volatility intervals (see below).

RISK CLASSES

Low number = Low volatility. High number = High volatility

| | Risk Scale | Annualised Volatility Intervals | |
|---------------------------|------------|---------------------------------|-----------|
| | | Equal or Above | Less than |
| Potentially lower reward | U* | - | - |
| | 1 | 0.0% | 0.5% |
| | 2 | 0.5% | 2% |
| | 3 | 2% | 5% |
| | 4 | 5% | 10% |
| Potentially higher reward | 5 | 10% | 15% |
| | 6 | 15% | 25% |
| | 7 | 25% | - |

*Funds marked with the symbol 'U' indicate that there is currently insufficient data available to calculate an SRRI.

Not all funds on the Utmost PanEurope unit-linked fund range can be assigned a synthetic risk and reward indicator. This may occur where not all of the relevant calculation information is available. For example, if the fund is less than 5 years old, the annualised volatility over 5 years cannot be calculated. These funds appear under the category 'Unclassified'.

Each fund on the unit-linked fund range has been assigned a risk category where possible. For example, funds with very low volatility will have a 1 or 2 rating on the risk scale. These funds generally have a more cautious approach with little or no exposure to equity markets and usually invest in cash or money market securities. You should be aware that for funds considered lower risk, the potential for reward will be lower as these funds are expected to yield lower returns than funds with a high equity exposure.

Please note that the fund's categorisation is not constant and may change over time.

Funds with high volatility will have a 6 or 7 rating on the risk scale. These funds tend to have a high exposure to less developed, emerging equity markets or use high risk alternative assets within their investment strategy. Over the long term, exposure to equity markets could provide the opportunity for higher investment returns however it also brings a higher degree of investment risk. Although investment gains could be made when markets are buoyant, losses can quickly occur when markets take a downturn. You must therefore be prepared not only for the potential for higher returns but also the potential for higher losses when investing in these types of funds.

INTERNATIONAL FUND SELECTION GUIDE

RISK SCALE

You should note that investment involves risk. Past performance is not indicative of future performance. Investors and/or their investment advisers are responsible for their investment decisions and any choice of funds is entirely at their own risk. Please note that investment performance (as well as the income accruing to an investment) may go down as well as up.

IMPORTANT NOTES

^The ‘Synthetic Risk and Reward Indicator’ (SRRI) was defined in 2009 by the Committee of European Securities Regulators (CESR) with the aim of providing investors with a method of assessing an underlying fund’s risk. This SRRI calculation has been provided by Morningstar based on guidelines provided by the European Securities and Markets Authority (ESMA) and Morningstar’s interpretation, methodology and implementation of said guidelines.

‘Annualised Volatility Intervals’ as defined in the grid above reflect the increasing level of risk borne by the fund and, therefore, its position in the risk scale. Volatility is a measure of variance of a financial instrument’s price over a particular time period, which means the greater the movement in fund prices, the more volatile the fund’s performance is. Funds with high volatility are generally associated with higher risk but potentially higher reward. Funds with low volatility are generally associated with lower risk but with lower potential reward.

OAKTREE GLOBAL CONVERTIBLE BOND FUND B USD ACC

↑

Aim: The investment objective of the Sub-Fund is to obtain an attractive total return from a combination of current income and capital appreciation by investing in a diversified portfolio of U.S., non-U.S. and High Income Securities. The relative allocation of the Sub-Fund's NAV between U.S. (including high income convertibles, which are predominantly U.S.) and non-U.S. convertibles will be: 10-90% U.S. convertibles and 10-90% non-U.S. convertibles. The precise allocation within these ranges will vary from time to time based on market fluctuations, the relative availability of attractive opportunities and other factors that the Investment Manager may consider in its discretion. There is no requirement that any security be rated "investment grade" by any rating agency. To achieve this objective, the Sub-Fund will seek to invest in a diversified portfolio of convertible securities which individually, and therefore collectively, may capture a higher percentage of their underlying stocks' gains than the percentage losses that they will reflect.
